>Hey Rick! Mac OSX 10.3.5 Panther is solid as a rock on all my systems. My opinion is that tiger is great, but it is not ready for prime time yet. if you want to do critical work don't go with tiger yet. Sorry to hear about all the problems with your system. In my years of experience as a user and a computer dealer, it's not like Apple to not address this type of issue.

Here are some recommendations:

If you have case numbers from the past, you should take your G4 in to an Apple store and have there tech guys fix it. If it is an unresolved issue with a case number they will still take care of it, if you have a case number.

If Apple does not resolve all of the issues, I would contact a law firm in Silicon Valley to rite a letter and send it to Apple's legal department. It shouldn't cost that much. In the letter, I would state all the problems, list the case numbers. I would request a refund of the purchase price or an equivalent current model G5 PowerMac. I would further state that the Mac was an essential part of your studio business, and as a result, you suffered substantial losses because of lack of performance. I would also tell them that you are filing complaints with the Better Business Bureau, the state attorney general of your state and the state of California. If it is not resolved quickly that there will be a lawsuit filed, possibly a class action.

Apple will take this seriously. The cost of the letter may cost you \$150.00, but the issues would get resolved. I have filed complaints with the BBB and have had companies resolve issues quickly wth out a lawsuit.
