wonderful sounding, but
frustrating rig. Wayyyyy more variables than I've got now. I was interfacing
over 100 digital I/O.

;o)

You just left out the part about the flux capacitors.....Along with my NHT A-20's and B-20 which are configured as midfield's I'm

using NS10's along with an Alesis Mattica 900 power amp and a powered KRK

sub as nearfields. Working nicely here.
