>Hello Jimmy,

Now that AMD cut chip prices to match intel it is a great time to build a new kit.

If you are interested here is a quick guide to the newest Intel Core2 duo chipsets.

<http://anandtech.com/mb/showdoc.aspx?i=2797&p=1>

These are the new kids on the block and not the same as the previous incarnation.

They are just limping into the market now as the majority get swallowed by OEM builders. Mobos for these are pricey except for a new offering from Asrock (Asus owned) for about \$60. You may be able to use your old ram in some instances but read the above buyer's guide.

I'm still an AMD person and just scored the Gigabyte K8NS ultra nforce3 off ebay.

Saludos a todos,

El Miguel
