Don't know if anyone has tried this yet, but it's interesting. There's also a downloadable phase reverse file for further consideration.

I really like the Liquid Mix. To me, it sounds great as a plugin at any price point, but considering the price, I think it's fantastic...

FWIW

TedHi Neil.

Other wise know as Direct Monitoring in Cubase.

ZLM is the term Magix uses for the same direct monitoring function.

This should only be a few samples at best.

The 1ms round trip through the AD/DA sounds about right for a converter that old.

The lower latency of the on board Multiface AD/DA sounds correct wi

>Hmm...look at Mackie, an American firm where their owners saw more \$
in China too. Sorry to say but investments of capital have no native
country at all, especially not when the world is being globalized the
way it is. Not any congressmen in America, or else in the world can
change that.

And now we have Russia on good way back in time for the people, with
Putin that's now going in front with the power with echonomic help
from Russian oil and gas and also with good help from his old KGB
friends from the old Sovjet. Putin is now controlling some of the
biggest oil and gasfields in the world. With the oil and gaspower,
Putin can really set Russia back in position for the top in the world.
The western world are extremely needing Putins oil and gas and is
doing nearly everything to be friend with him. If we're talking about
a form for worldpower-poker here, I can say Putin now seems to have
the best cards on his hands to get back the power of the world, as it
seems that Bush and his administration now have destroyed for America
with their "Texas-pokerplayings" around the world the last 7 years,
after the Sept. 11 attack.

It's not many weeks ago since Putin demonstrated his new military
power right besides the Norwegian oilproducing installations in The
Nort Sea, right out from here where I'm living.

The Russian military activity have been dead in the North Atlantic Ocean since the collaps of Sovjet. Now it's like old cold wardays again are coming here. So it shows up really well that Putin are demonstrating that he now have the power to show the world he can also tackle political problems outside Russia. By the way, the Russian Navy with both ships and aircrafts that demonstrated their power here, have sailed into the Meditterranian Sea, just showing up that they again can both protect or destroy.

The world need oil and gas, so worldleaders are standing in cue to be friends with Putin and kiss him. Also Bush have been over in Russia to give Putin some friendly kisses and great smiles. So Putin and Russia must have some kind of things that the western world extremely well need for the future, to build up a form for "friendship".

Chinese workers are "stealing" western jobs, not only from American people but from the whole western world, but with money from the western world's investors, that only have money and power as their native countries. Uli Behringer is just one of them that saw a new way to sell, as Jamie Engen, the President of Loud Technologies, also knows a lot about.

Just my 2 cents sitting outside USA and also getting political informations from different places in the western world.

Sorry, couldn't hold me from the political arena after some years of saying nothing;-) Generally, I should wrote this in General, but it seems General is more dead then alive;-)

Erling

to this

balance - it's like getting a kid addicted to candy and then telling him to exercise daily, eat right, and lead a balanced life, while slowly feeding him more and more costly candy to keep him on task. Doesn't work.

The world needs to move away from oil as an energy source. It isn't renewable unless we live to be 10,000,000 and our population never grows (another problem that needs to be addressed - growth as a prosperity goal - it's a dead end as well).

I'm seriously hoping to be able to go hybrid with our next cars. With US gas prices projected to pass \$4/gal this summer (I know that's not much compared to the UK, Aus, etc), it's long past time to make changes. At this point, I think we are lessening the damage, not solving a problem, so we as a civilization are living on borrowed time.

Just my .02. Sorry to further extend the OT drift of this thread.

BTW - couldn't get the original link to work, but I found the videos on YouTube - interesting. Can't say I like Behringer more, or less - just interesting.

Also interesting, apparently the new Euphonix controllers are manufactured in China - that's how they went from a \$16k controller down to a \$1500 version.

Regards,
Dedric

<http://www.orthopets.com/photo/index.html>

These guys are in Denver. I'll probably arrive Thursday night, get his leg casted on Friday, they will build the brace Saturday, he will get fitted and adjustments Sunday and we will and leave Monday.

I'm probably going to be pretty hotel bound in the meantime since he's not going to be extremely mobile, but I'm thinking about renting a minivan so that he will have plenty of room and if it's not too cold, we could probably grab a bite while he hangs in the van or something. He's short haired so I can't leave him in the cold for too long.

DeejWe get to meet Crashbas

ket!! Count me in.

Right now it looks like Friday or Sunday could work.

We could order takeout or just have lunch at the hotel so the Crasher doesn't have to ride around in the cold.

Cheers,
-Jamie

That would work. If we take him out in public we'll eventually get surrounded by throngs of people as everyone who sees him will first say "Wow!!!...that's the biggest dog I've ever seen" and then want to come over and pet him (something he loves), ask how tall he is, how much he weighs and those who have previously owned Great Danes will start talking about how cool their Great Dane was and some of them will start to cry.

It always happens

I'll let you know where we're gonna be staying.

;o)I'm pretty sure I could make it up that way Friday or Saturday - Sunday might be tough
as I think I'm tied up that morning until 1 or so, and then again that evening.

I would offer to bring our Newfy for a doggy playdate, but probably not a good idea for Crash at the moment :-(

Regards,
Dedric

I'm sure Crash would love to play with your Newfie, but he's getting a bit lame in one leg right now so maybe not a good idea this goaround.

I'm checking on doggie friendly hotels in the vicinity of the place we will be getting the work done. I'll let you guys know when I know.

I want to see Macy's new studio while I'm there. Crash is a very well behaved studio hound. He's right at home amongst racks of gear, although he can create some pretty high SPL if he decides to offer up an opinion.

;o)I'm way up for seeing John's new place, too. Still haven't made it over there (except once long ago, the first time he ran that place).

Saturday I'll be in Boulder to try and learn something about EV batteries at the next Denver Electric Vehicle Council meeting.

Cheers,
-Jamie

A few years ago I ran across this gal in Petsmart with three Great Danes with her... one of 'em was absolutely enormous - the others were normal, good-sized for their breed. She was wearing a rescue service jacket of some kind & I asked her if they were pets or working dogs; she said they used them for finding people that were lost in the mountains up in Big Bend Nat'l Forest east of here. I remarked that I hadn't known that Danes were used for tracking, and she said they could track OK, but they mainly used them because they're so robust & can take that kind of terrain for long periods of time. So, the bigger & stronger they can get 'em, the better for their purposes, I guess... and that one pooch was frickin' enormous!

NeilYou doubled my score - you rat-bastard! lol
I went with whichever one I thought sounded thinner, or less high-fidelity as the LiquidMix. If both sounded good, but one sounded "smoother", that was the one I picked as the analog clip... not all that scientific, perhaps, but it gave me a "control" group, in a way - the hypothetical center where I wasn't guessing, but was rather making my se

I think that if he were outfitted with a cardigan sweater he could sub in for Mr. Rogers, part 2. There's plenty about Ron Paul's message that I like, and plenty about it that is seemingly from outer space. He seems to be in total denial of some pretty major global realities and I would like to hear him explain exactly how he plans to convert our currency to the gold standard. As far as Moyers is concerned, I love the obvious bias in some of his questionsso ...since I can't really say much nice, I won't say anything.....I know that's not like me, but I've sorta' got a soft spot for him from my days when I was a hard core liberal kinda' guy.....before I stopped using mind altering substances.

Well.....I'm certainly game. It's only about 4 hours from here. Closer, timewise, than Denver.

I'm curious about exactly which "global realities" you think he does not
understand?

I have noticed a tendency in the mainstream media to portray Ron Paul as
a kook or a crazy, without stating any specific reasons whatever. That
kind of covert slander of a person's sanity is really slimey IMHO.
That's what people do when they are really desperate to win an argument
and they have nothing.

Anyway I am fed up with the apathy we face in this country about
changing our government institutions and political system. I think we
can do something about it, and I like that Ron Paul is standing up to
say "I am the man who will do it." That takes a LOT of courage.

I think he meant we all do less than honorable things now and then.

It's a good point that someone who has seen corruption, the systemic kind,
not the human-weakness kind, is better equipped to deal with it.

Bill & Ron says:

BILL MOYERS: --who own, as you say, a lot of the media out there.=20
RON PAUL: But I think it's still to this philosophy they believe in. =
They believe in war. And they believe in the military industrial =
complex. And some of these companies that are mixed in with making =
profits off war.

I think that's a distorted crock, personally.

BILL MOYERS: You remind me of something you told Tim Russet on MEET THE =
PRESS-- you talked about fascism. Look at this piece of tape.=20

RON PAUL (on MEET THE PRESS): Were not moving toward Hitler-type =
fascism, but we're moving toward a softer fascism. Loss of civil =
liberties, corporations running the show, big government in bed with big =

business. So you have the military industrial complex, you have the =
medical industrial complex, you have the financial industry, you have =
the communications industry. They go to Washington and spend hundreds of =
millions of dollars. That's where the control is. I call that a soft =
form of fascism, something that is very dangerous.=20

yadda yadda....and then he says:

RON PAUL: Yeah. Now we're living in an age today in this post-9/11 =
atmosphere where our civil liberties are being undermined constantly. =
All in the name of safety and security we're supposed to give up our =
rights for our privacy? We're allowed now to accept the idea of secret =
prisons and secret renditions, and the lost of habeas corpus. This is =
very, very dangerous. And I don't want to get to the point where it's =
hard to reverse. Matter of fact, right now it's getting more difficult =
everyday to reverse this trend, because the American people seem to so =
often say, "You know I want to be-- I can't be free, if I'm not safe. =
So, I want my government to make me safe." And they're willing to give =
up their liberties. And I'm convinced that you never have to give up =
liberties to be safe. I think you're less safe when you give up your =
liberty

I think Paul totally doesn't get the fact that due to our open society, =
our own laws can be used against us in time of war.....except if you =
don't believe we are at war, in which case I say that his is dangerously =
in the twilight zone concerning some global realities. We have always =
had to take certain measures that restricted our freedoms during time of =
war.=20

<http://www.wired.com/politics/law/news/2001/09/47051?current Page=3Dall>

They were measures that were deemed necessary at the time and they have =
also always been rescinded when the war ended. This is no different. =
Many of us are just in total denial that we are at war.....a very =
real, down and dirty, no holds barred war.

I also think that his foriegn policy is, despite trying to put a new =
sole on an old shoe, isolationist, and all you have to do is look to =
history to see how that kind of policy has allowed conflicts to fester =
and escalate until we are called upon to field a massive military =
juggernaut in order to end a world war. If anyont thinks that war is =
going to go away just because we do, they are living in Disneyland. All =
that will happen is that we will

> understand?</DIV>

<DIV> </DIV>

<DIV>Bill & Ron = says:</DIV>

<DIV>BILL MOYERS: --who own, as you say, = a lot of the media out there. </DIV>

<DIV>
 <P>RON PAUL: But I think it's still to = this philosophy they believe in. They believe in war. And they believe in the = military industrial complex. And some of these companies that are mixed = in making profits off war.</P>
 <P>I think that's a distorted crock, = personally.</P>
 <P>BILL MOYERS: You remind me of = something you told Tim Russet on MEET THE PRESS-- you talked about fascism. Look at this = piece of tape.
 <P>RON PAUL (on MEET THE PRESS): Were = not moving toward Hitler-type fascism, but we're moving toward a softer fascism. = Loss of civil liberties, corporations running the show, big government in bed = with big business. So you have the military industrial complex, you have the = medical industrial complex, you have the financial industry, you have the = communications industry. They go to Washington and spend hundreds of millions of = dollars. That's where the control is. I call that a soft form of fascism, = something that is very dangerous. </P>
 <P>yadda yadda....and then he = says:</P>

<P>RON PAUL: Yeah. Now =
 we're living=20
 in an age today in this post-9/11 atmosphere where our civil liberties =
 are being=20
 undermined constantly. All in the name of safety and security we're =
 supposed to=20
 give up our rights for our privacy? We're allowed now to accept the idea =
 of=20
 secret prisons and secret renditions, and the lost of habeas corpus. =
 This is=20
 very, very dangerous. And I don't want to get to the point where it's =
 hard to=20
 reverse. Matter of fact, right now it's getting more difficult everyday =
 to=20
 reverse this trend, because the American people seem to so often say, =
 "You know=20
 I want to be-- I can't be free, if I'm not safe. So, I want my =
 government to=20
 make me safe." And they're willing to give up their liberties. And I'm =
 convinced=20
 that you never have to give up liberties to be safe. I think you're less =
 safe=20
 when you give up your liberty</P>
 <P>I think Paul totally doesn't get the fact =
 that due to=20
 our open society, our own laws can be used against us in time of =
 war.....except=20
 if you don't believe we are at war, in which case I say that his is =
 dangerously=20
 in the twilight zone concerning some global realities. =
 We have=20
 always had to take certain measures that restricted our freedoms during =
 time of=20
 war. </P>
 <P><A=20
 href=3D" http://www.wired.com/politics/law/news/2001/09/47051?current Page=3D=
 all"> http://www.wired.com/politics/law/news/2001/09/47051?current Page=3Da=
 ll</P>
 <P>They were measures that were deemed =
 necessary at the=20
 time and they have also always been rescinded when the war ended. =
 <FONT=20
 face=3DArial size=3D2>This is no different. Many of us are just in total =
 denial that=20
 we are at war.....a very real, down and dirty, no holds barred =
 war.</P>
 <P>I also think that his foriegn policy is, =
 despite=20

trying to put a new sole on an old shoe, isolationist, and all you have =
to do is=20
look to history to see how that kind of policy has allowed conflicts to =
fester=20
and escalate until we are called upon to field a massive military =
juggernaut in=20
order to end a world war. If anyont thinks that war is going to go away =
just=20
because we do, they are living in Disneyland. All that will happen =
is that=20
we will just have to deal with a bigger mess on a larger scale than we =
are doing=20
now.</P>
<P> </P>
<P> </P>
<P> </P>
<P> </P>
<P> </P></DIV>

> we are all corrupt? bullshitHis views on Iraq are poorly informed rhetoric that not even Hillary
would embrace. Yet, he hammers away at every opportunity at them
with a religious zeal to the point that he appears unbalanced.

Personally, I like a lot of the Libertarian outlook, but, and this is a huge problem for RP IMO, his plan to end the war would hand AQ and the mullah meat puppet in Iran an instant victory and we would be dealing with the results for decades.

Oppose the war? Fine. f*cking fine. Just come up with a realistic plan for ending it. His is nuts.

What pissed me off was Romney and McCain talking about how many decades it would take to be energy independent. That is politician-talk for "I ain't gonna worry about it, the next jerk can deal with it". Idiots.

We need more refineries. NOW. and we need to drill drill drill until our own oil production can impact the market and take the power away from these effin' lunatics, and we need to crash-course alternatives and NOW.
