card, 2 mec, 4x8 in/out, 1 adat,
3 x C-16 system out of the gate in 1999. \$\$\$ I wanted the ability
to record 32 tracks live. No one at EMU had the answer why
Mec B would go through the motions but never record audio.

It took over a year to find out why. It sure isn't in the manual even
after 3.0 as I recall.
Piss me off.

I'm better now.
Tom
