t;were studied and compared. I found this study, which included 3 very popular
>burners. I have a Lacie drive that has the NEC ND3520A drive in it and
was

using
>>Tao Yudens.
>>Gene
>NO Limit
with no look ahead 2 samples=nudge back 1ms and apply 78 samples with sampleslide

..001 look ahead 50 samples latency= nudge back 1ms and apply 30 samples
with sample slide

..025 look ahead...nudge back 27ms (25+1+1)and apply 78 samples with sample
slide

that's all I use. either the .001 or the .025
hope that helps
