I get error in rendering track to disk. error code 1879248898/70031002
when i try to render 3 plugs on two identical tracks.
Paris really is a piece of crap for me. I thrilled you all have
success. I have wasted years of my life on this piece of crap.
John

I use Itunes as my main Play back at home so i want the best sound I have a pc the I rigned with a emu 1404 through a bench mark. I dont buy song from Itunes as I find it wrong to charge top dooler for files that are less in quility than cd. j"Pete Ruthenburg" <ruthenburg@sbcglobal.net> wrote:

To "sum" it up, IMO... HD = "Good"; earlier PT systems = "Bad"

Never mixed in "LE", so I can't comment there, but I've done
some overdubs in it... the 002's convertors were adequate/OK.

NeilDon't forget the BNC cable from MEC out to 442 in, that's assuming your MEC
is on card A. NO, can't share resources between submixes. Yeap, cards stay
connected as before. That's my setup here, 2 card on MEC/442 works great.

Have fun..!

If you cut them all to the same length that seems to minimize
the likelihood of a crash. Save before trying anyway.

>Hello and Happy New Year!
I recently released a CD that was recorded completely in PARIS. It was mixed in PARIS too but Distressors and a Rane MOJO compressor were enlisted mainly to process the bass, snare and kick on a few occasions. MP3 samples of all the songs are available at www.imaginaryfreds.com

I have worked on many local musicians' projects but am hardly a seasoned recording engineer like many of you. This is a great newsgroup and I have followed your threads for years in an effort to improve my knowledge of PARIS.

Although I have nothing useful to offer in return, I would be grateful if some of you could listen and comment (especially regarding my screw ups with PARIS or whatever that upset your ears!).

This CD was mastered by a professional at his mastering studio.

Thank you very much.
Best regards,
Jim

that codec/format' thing too many times, and MP3 is not going anywhere anytime soon. If I want the better res version I put the real thing in the CD/DVD player. I'm pretty much on the go these days though, and I don't need hassles.

YMMV

Cubase CH 37>RME 2 ADAT 2-14 out > Paris CH 6
Cubase CH 38>RME 2 ADAT 2-15 out > Paris CH 7
Cubase CH 39>RME 2 ADAT 2-16 out > Paris CH 8
Cubase CH 40>RME 2 ADAT 3-17 out > Paris CH 9
Cubase CH 41>RME 2 ADAT 3-18 out > Paris CH 10
Cubase CH 42>RME 2 ADAT 3-19 out > Paris CH 11
Cubase CH 43>RME 2 ADAT 3-20 out > Paris CH 12
Cubase CH 45>RME 2 ADAT 3-21 out > Paris CH 13
Cubase CH 46>RME 2 ADAT 3-22 out > Paris CH 14
Cubase ST CH 47L/ Stereo Group 2 L> RME 3 ADAT 3-23 out > Paris CH =
15
Cubase ST CH 48R/ Stereo Group 2 R> RME 3 ADAT 3-24 out > Paris CH =
16

.....then you need to remember to turn on all of the external =
digital
procesors that5 are interfacing with Paris and Cubase through the =
digital
patchbay or directly before you turn on your external word clock =
module,
followed by booting the DAW which is running the control panel for =

your

digital patchbays and starting the digital FX processors in this =
box, then

boot your Paris DAW, launch the Paris app and then boot your Cubase =
DAW and

launch cubase. If you don't do it in this order, Paris will =
crash.....and

I'm pretty pissed that this was nowhere in the manual.

;oD
