

to
figure out what parameters to sent it - there's like 25 of them or =
something
with next to no documentation, and I have to build a GUI. But, I'm =
really,
really close to getting it out.

I was thinking we could all work together getting some presets going =
for
it. It's really cool. It allows you to change the internal =
resonances of
the reverb so it can be made to sound like a plate or a room or a =
concert
hall, etc. This way, we don't have to rely on Matt's code, too. I =
feel
a little uncomfortable releasing someone's software without their =
permission.
And, I don't have a copy of it anyway.

I'm hoping by the end of this next week I'll have it out.

Thanks again!

Mike
