ly... try following these instructions again paying
closer attention to the FX subsystem installation. That one
got me once as well... it pretty easy to mess up.

David.

y it's more like, not every drive

>> manufacture supports Apple. Thanks to third party software manufacture, >> most drives are supported for the Mac.

>>

>> Remember Apple was the first computer company to offer DVD burners on >> computers.

>> Prior to that a dvd burner cost \$6,000.00, I know I was a computer dealer.

>> The first Apple machine was less that \$2,500.00, that was a hell of a deal

>> back then. They started off with the Pioneer super drive, it was the only

>> one available at that time. Pioneer had years of experience starting back

>> to the pioneer laser disc. A raw Pioneer drive was about a grand back then.

>> With in 6 mo. they were about \$700.00 and PC manufactures were getting in

>> to the game. So my hats off to Apple for blazing that trail.

>>

>> What does suck is how Apple has locked us out with hardware profile. This

>> is basically what you are saying. There are other options available on the

>> DVD front. There are many things that suck about Apple and the MS way they

>> have chosen to conduct business in the last four years. They have dropped

>> VST support in some of their audio products, they have no direct support

>> for Mpeg2 video in some of their video products. Mpeg2 is the industry

>> standard

>> in video (DVD). Yet they want to say they support open industry standards,

>> which is bullshit!

>>

>> With third party software you can do all the things you want to on a Mac,

>> but that cost more money. Apple's video software, you have to convert/encode

>> every thing to QuickTime, then edit your video, then encode back to to MPEG2

>> to burn to DVD!!! Who in the hell has time for all that!!! Apples answer,

>> oh buy our new faster machine, it encodes faster. I say F*** encoding,

>> and F*** Apple!!! I went out and bough two cards for my PC and now I can

>> encode in real time, and it cost me a total of \$50.00 on sale!!! I no longer

>> have to wait hours. So Apple has Mpeg4 in quickTime now, so what! DVD

>> and Mpeg2 are the standards not Mpeg 4, I can't rent an Mpeg4 disc and play

>> it in any of my DVD players. I don't think they have gotten lazy, Apple

>> has just gotten greedy! They didn't want to pay Mpeg for Mpeg 2. It cost
>> \$20.00 just to get Mpeg2 player in QuickTime.
>>
>> It used to be that you could be running 8 year old software on your Mac.
>> It was an advantage over PCs in many cases. Now with OSX, Apple dumps older
>> hardware support. They just dumped support for my iBook G3 which is about
>> 3.5 years old. So no more G3 support! They were still selling G3 models
>> 2.5 years ago. iLife 06, GarageBand 3 is no longer supported on G3 models,
>> they have locked us out with hardware profile. That sucks! The more
Apple
>> uses tactics like this the slower I and many other people will be to upgrade.
>>
>> I'm not totally happy with all of Apples decisions, so I can understand
your
>> frustration. Some of their decisions are just business decisions, and
I
>> understand that too. Putting the above mentioned aside, I think Apple
is
>> a great company with great vision and great innovation. There audio support
>> in OSX is great, and AU rocks. The concept of one company designing the
>> hardware
>> and writing the OS and software to run on that hardware is good. It means
>> tighter integration and less problems for the end user. The trade off
is
>> less upgrade hardware options. Hopefully Apple will make good decisions
>> when it comes to OEM products.
>>
>> On the DVD burner, there may be some better choices, but I can tell you
that
>> Pioneer is a good solid choice.
>>
>> As for your mouse pad, well I can't comment, I use a Kensington track
ball;
>>)
>>
>> James
>>
>>
>> Detric Terry <dterry@keyofd.net> wrote:
>>> Hey James - it may have been Pioneer. Certainly nothing wrong with them,
