-----=_NextPart_000_0310_01C61F6B.7E363000--Yes you can. I think the manuals, esp. the service manual, and the perfect condition help. I already had someone trying to buy it early.

Hey don't feel bad, I sold my original LA-2A for 450.00 back in 1985. Guess I should have kept it a while...

Here's the amp:

<http://www.staramplifiers.com/>

It's the Blues Star. What a tone!

DC

versatile I'd look at ebay and try to find an SWR SM-400 bass head. Tube preamp stage and a parametric EQ that will give you a pretty wide range of sounds. A bassist in a band I played in used one and we had very good luck with it as a direct amp as well.

rind with Apple and FCP.

These conflicts on interest are part of what's good and bad about being both an application and system software vendor (and in this case a hardware vendor to boot).

That said, it sure wouldn't *hurt* Digi when they sit down at the bargaining table to have the rumor out there that they were considering moving their entire user base to Vista machines, would it? I would guess it's probably in Digi's self interest to simultaneously hold on to it's base of Mac users while keeping these kind of rumors percolating about at every NAMM show.

. I'm thinking it wouldn't be
too bad.....heck. lots of mics have pads so those padded signals are sent
down the entire signal path anyway. what's the harm?

Any LP guru's out there?I went shopping recently, looking really for a DVD player to play MP3's
with.
My previous one did it, but there was no shuffle mode, and if there's one
thing that MP3 listening wants it's a shuffle mode. They don't call them
iPod Shuffles for nothing.

I really just wanted to pick up a \$45 DVD player which would let me shuffle
MP3's, but mid-shop I r

>Thanbks Gene. I certainly *get it* about the pads being before the
transformer in the mics. I've got some high quality 3' pigtails I could hang
off the back of some of my preamps to make the LP's more accessable. That's
probably a more sonically desirable solution.....or I could just buy one
of these

[http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=7383039376&rd=1&sspagenam
e=STRK%3AMEWA%3AIT&rd=1](http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=7383039376&rd=1&sspagenam
e=STRK%3AMEWA%3AIT&rd=1)

and use it for the entire kit except the OH's (gotta use the GR for those
;o)

I remember BrianT saying that he had a couple of these and thought pretty
highly of them. You ever tried them? Looks like lots of headroom and
pads/phase on every input.

>> Performer Pro Model - FAQ

>>

>> Where & what we Build

>>

>> We manufacture and install the self-tuning system into electric

>> guitars in

>> Fort Collins, Colorado. Currently, we support any guitar body that

>> closely

>> resembles the Les Paul, Les Paul Special, Telecaster and Stratocaster

>> body

>> shapes. Telecaster models generally require a small shim at the neck

>> joint

>> and a rear cover plate that is over the back face of the body instead of

>> recessed. This is due to the thin body thickness.

>>

>> How Long does it Take
>>
>> Installation normally takes 3-4 weeks. Times can be longer depending on
>> the number of current orders.
>> Pricing
>>
>> The system and installation for a Les Paul, Les Paul Special or
>> Telecaster
>> is \$3,399.00. The system and installation for a Stratocaster is
>> \$3,899.00.
>> The purchase includes system and installation, power supply, power
>> cable,
>> footswitch, user's manual, 1 year limited warranty and technical support.
>> The additional \$500 price for the Strat covers a new body that is built
>> and painted the color of your choice. We also offer an accessory kit for
>> battery operation for an additional \$250.00. The Accessory kit includes
>> a rechargeable battery, guitar strap battery carrier, cables and charging
>> system.
>> Supplying the Guitar
>>
>> You can supply the guitar or we can purchase one for you at a great
>> price.
>> We have special arrangements with guitar manufacturers and their
>> distributors
>> that allow us to pass incredible savings to our customers. Let me
>> know if
>> you are interested in a new guitar.
>>
>> Warranty, Direct Sales, Credibility
>>
>> The system comes with a one year limited warranty, and we also offer a

>> two
>> year extension for an additional \$300. Currently we sell only direct to
>> the customer to keep the retail price as low as possible. We heavily
>> rely
>> on our extremely rich list of customers and endorsers to give the product
>> the credibility it needs to convince interested customers that the
>> product
>> does what we claim and is worthy of their investment.
>> Mechanics & String Gage Choice
>>

>> The Performer is a electro-mechanical tuning system that actually adjusts
>> the tensions of the strings. This is accomplished by balancing each
>> string
>> with a spring to allow the tiny motors to make the tension
>> adjustments. As a result, the customer chooses the string gauge set
>> and manufacturer of

>> order. The mechanical device is then set-up at the factory and
>> delivered according
>> to those choices. The choice of string gauge is important because the
>> mechanical
>> device will only run the string gauge it is set up with. The string
>> gauges
>> can be changed, but this requires that the system be returned to the
>> factory
>> for mechanical and software upgrades
