-spam@not_here.dude> wrote in message =
news:469c4ccb@linux...

Yup. Strip it ALL down to a PC only with video card, one EDS and one =
MEC. Get that flying, add a second EDS.. pull the 2nd EDS, try another, =
etc... do the same with MEC's and cables.=20

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:469c263f@linux...

Intermittant success is the best I've got right now.

I plan to install Paris on another comp, try each EDS
individually and each SCSI cable individually with the 442. If
all goes well or not I will have an answer. Next, try the same in =

the actual Paris rig without the Magma. If I can get regular
Paris boots there then it's the Magma power supply
or Magma cable. I'm thinking power supply. I always
had all 5 EDS cards showing even when the hardware
attached to them wasn't.

Does this sound like a logical approach to you?
I'm sick of chasing my tail.
Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message =
news:469bfc6c@linux...

I don't s'pose it could hurt if they're tarnished. My =
experiences though with the issue your seeing have been bad SCSI cables. =

Start small, test every little component, unless you've got a =
bent up input pin somewhere (and I'd light them well and magnifying =
lense them all) I'm having a hard time buying that you have 4 dead =
cables out of the blue though, something caused that if it's the case.=20

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:469b74bf@linux...

Aaron,

Hyperthreading is off. I'll double check though. I'd love to =
save the money

on those scsi cables.

What do you think about Deoxit in the female scsi jacks?

Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message =
news:469aead6@linux...

This might be flogging the rented and dead mule, but you did =
verify that dual core was off in this equation, and hadn't been flipped =
back on by a gremlin?

#64;linux..." target="_blank">469ad5e8@linux...

Ya Jeff,

At least half the times no C-16 was attached.

Do you think that a bad C-16 cable could cause these =
issues?

I'll remove them from the setup until all is well.

I know at least a few times it worked that the C-16 did =
also.

Tom=20

"Jeff Hoover" <jkhoover@excite.com> wrote in message =
news:4699b378@linux...

Tom,

Stupid question, but did you ever start up without any =
c16's? If so did=20

you see the same issue?

Jeff

Don't have office?=20

OK, 2 options. Go get a google email account (<http://gmail.google.com>) =
and use the online one, or go to www.openoffice.org and get open office. =
Has excel type program.=20

Both are free.

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:469c64a4@linux...

Thanks Aaron. I'm moving the small stuff up to an open area with =
another comp right now.

I'll begin my madness shortly. I don't have Excel but I am wicked =
good with chisel and stone.

I'll post when something turns up to get your opinion(s).

Tom
