it's a D-6 through a Chandler TG-2, and I had picked up
Earthworks
Kick-pad recently, so I stuck that on the kick mic, too, since we
had the
kick all stuffed with towels & such up against the head to
prevent it
from double-triggering on the rebound... I figured I'd see if the
kickpad
might help give me some tone right off the bat & it worked out =
OK. From
there it was just my usual Multiband comp/No EQ settings for the
kick.

The =

Mics/pres=20

After trying multiple combinations of David and DJ's ideas
I am still unable to see more than the Master hardware device
be it 442 or a MEC. =20

There is a problem with using Card D as the master card.
It's mixer doesn't allow a Control Room out. That's a no go=20
for me.

Any other ideas that you can think of ? I wonder if there is any
chance the 4 MEC setup will work if this is so flakey with my gear?

Thanks for any new ideas you have.
