-----090906070505070201070104--Thanks Edna... I'll try that. I seen the normalize button,
but was unsure

how it operated. In fact, I wished I known this option a few days ago...

would have saved me lots of time. I was trying to remix/remaster some older
projects and songs.. and it was very time consuming to individually adjust
each channel. Thanks again... :)

amazed at what all it can do. I did try out a Roland unit one time but was
disappointed with the sound - dead, cold, etc. I am using Paris to track
vocals and synth mainly for church related things, BG tracks, CDs, etc.
Also for writing my own stuff - I play kybds/sing. Used to play in bands.
I got Paris for the sound. I prefer analog, and Paris was touted as the
nearest to that. It certainly wipes the floor with the Roland, IMHO. And I
love the editing features. At the moment I am experimenting with mixdowns,
trying to get the exported stereo files to sound as good as the original mix

Well, at least as good. And hopefully better. At this point it is losing some quality. I am doing most of it in Paris and some in CEP. I am getting plenty of volume, avg RMS level at around -12db. It really distorts the boombox, computer speakers, and my truck speakers, so I have to turn it pretty low. I'm going to try more eq to get rid of some of the hi/lo frequencies that are not important to the mix.

To be honest, that is exactly why I am going
> through all my projects again and remastering them... I tried to do all my
> mastering myself... I've learned alot about it since I been doing it for

> to listen. As I read one article, you certainly don't want little suzie's boombox to be farting... lol Sorry, but I found that ironic and very true.
> My normal routine is to find a great mixdown in Paris with decent studio speakers (believe it or not, I currently use Behringer B-300's for this).
> Then, I use the old CoolEdit Pro and convert the mixdown to a .wav. In CoolEdit I use a touch of iZotope Ozone plugin (which has a great equalizer, maximizer, etc.) and then convert to 16 bit in Cool Edit.

So you bring in a 24bit PAF mixdown file into CEP? I tried that with a 16bit PAF and CEP played it too fast, even though is said SR was 44.1Khz?? Same file as a Wav plays correct?? Anyway, I havent tried recording at 24bit in Paris yet, maybe it will be better.

Burn it and listen
> in the car, the truck, the boombox, home stereo, even

put it in the DvD player
> and listen through the home theatre system. Of course, to be honest, you'll always find things to adjust or wrong..

Yep, every time I hear the mixes I will change things. I am also bringing in other commercial CDs into Paris for a/bs. I'm a very long way from getting anywhere close to these.

EdnaThanks EK, I know about all of that but I was talki
