Cubase has asked me the question:=20
Pending Connections: Direct Music/Midex 3.1.
Should this be assigned to my MIDI card?
It isn't listed as one of the options. The only thing
Midi related is Midi Map. Is this where it should be?
Everything is working now with it assigned to the
Delta 66 A-B out. =20

I am in need of a new ide drive. Is Seagate the current
'go to' drive company? I'm looking at the 7200 - 8 meg cache j

Sampled piano? What kind? Sounds good.

CLThanks, Chuck! I already have all but the Eventiter, but I download everything again because they're FREE!

Chuck, YOU ROCK!

CLWe have that exact unit here and had to swap out the rom chip for it to work with the PC. Pop the top and look for an 8 pin dip that has a sticker on the top, it will clearly be labeled MAC or PC. It is possible that they have developed a generic rom negating the need for different chips, but it wouldn't hurt to check.

David.
