><http://osx86project.org/>Hey guys,

Thanks for all of the tips. I didn't know the options were so much more varied. I think I'll probably go for the M-Audio. Not too expensive, uses the Mackie protocol (should be more software/hardware agnostic) and very nicely is from the company that distributes Live so I'd guess support for my new most beloved app will be good. Tascam is a close second though, but thanks to everyone.

what happens?

<http://www.mwave.com/mwave/skusearch.hmx?SCriteria=BA22051&CartID=done&nextlOC=>

.....I mean, the AMD 64 4200 x 2 is also a socket 939 and, of course, so is the mobo socket, so barring a bios snafu (entirely possible) mightn't this be possible? It would seem that the AMD 64 4200 X2 would be faster since the cores are running at 2200 MHz per processor, but the Opteron has 2 x 1MB L2 cache and an unlocked multiplier (if accessable from the bios) and from what I hear, a better formulation of silicon.

Hmmmmmm.....man I'm tempted. Why don't y'all pass the plate and send me one of these?

;oDThad, you're setting ideas in my head but I've buyed my Christmas presents for this year;-o. I've looked at the M-Audio plenty of times the last couple of months but I have some different sizes mixers here to couple up to my E-MU 1820M, so maybe I'll end up "only" with a Frontier. But have thoughts about how clean and easy it will be, only with an all in one box, so the idea is still living.

<grin>

I don't care in the least about computer platforms. Heck, I like
Sequoia so much I'll use a <retch> PC to get it...

Personally, I think OSX is hotel room porno and tomato soup warmed
on a hot plate, but XP is finding a weenie on a girl and eating
salad peppers cuz you ran out of Mac n' cheese...

There's a song in here somewhere...

P</BLOCKQUOTE></BODY></HTML>

-----=_NextPart_000_0069_01C606E5.D8824010--Hey David,

Maybe I did not made things clear.

It is not Mecs where to get attached.

I have three mecs hanging over card A, B, and D.

It is the interconnecting cables over pci cards thatI am worried about.

Regards,

Dimitrios
