You clearly need medication. With that kind of logic America would end up with an electoral college instead of a true democracy.

Aaron,

That's where I was yesterday just before I installed=20

Chucks plugs and a few VSTs that are wrapped.

The stock fx are working but not all of Chucks.

The presets weren't there for the stock ones either.

Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message =
news:47213008@linux...

do a flat, no frills install man. no FX other than the stock ones. =
StockFx.dll is what comes with. mod3a.dll I 'think' is a chuck plug, but =
I could be wrong about that one. Stock, bone dead stock install and see =
what happens. Also, I've noted over the years when =
installing/uninstalling paris you need to boot/reboot cold to get it =
happy between 'any' install/removal process. completely and absolutely =
uninstall. Reboot. Delete anything left behind. Reboot. Install. Reboot. =
Does it work at this point in the game?

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =

Aaron,

I should have mentioned this started happening after I installed the
newer (but not Mikes yet) Paris effects. The FreQ or modulation =
bundle=20

don't show up either. They're probably one of the problem here.

Tom

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =

This sounds like you have a bad/corrupt set of files to me. Did =
you try another installer?

Also, if you still have 2.1 or 2.2, have you tried that as well?

If you pulled this from an image (ghost, acronis, PING, etc...) =
I'd bet on a bad image. If not, I'd bet on bad installer. Either way, I =
think you're fooling with corrupted files.

news:47203fcd@linux...

Hey everyone,

I am functional but barely right now. One 442 with no =
SPDIF is no bargain...

Major problems with newest install and computer:

At Paris start up it says: StockFx.dll not found =
twice.

It also says: mod3a.dll in system32 folder not a valid =
Windows image.

I think I should just remove the mod3a.dll from the =
system32 folder right?

StockFx.dll should have been part of the Paris install =
right? Where

can I find it and where does it go? Paris Pro folder?

Paris also works smoothly except two of the three =
C-16s won't work entirely right.

I tried to get them all working in classic mode but =
the configuration is never saved.

It remains C-16 1 is Classic and 2 & 3 are Pro mode.

I saved the project before resarting though. Hmmm? =
Everything else seems to save ok.

The audio on card B never works. I have to assign =
Submix 2 to Card C. I've tried two cards

with the same results. I'll try another. Paris =
closes fine but a Windows error comes up and=20

asks if I want to send it to their sorry asses =
everytime. No BSOD though.
