http://www.avadirect.com/product_details_parts.asp?PRID=5148That looks like it would make a
dandy internet and card game
machine... might have to get me a couple! ;-)

David.

>weird!

well... digi settings now say sync again... but i have working adat modules
on mec2.

i don't hear anymore pops. spdif is pretty stable... every 45 seconds or so
it blinks to 48k and back to 44k.

so since i am hearing no more pops... th
