Personally, I'd wipe the system and use whatever system restore/Windows XP disc came with it.. assuming one did. If not, then yeah download <http://free.grisoft.com> the free version of AVG, complete scan/clean it, and if you will never connect to the internet you can remove the program. However, it's free so I would probably just kill the services when I start up because you never know when a client might bring you a 'present' on a CD, DVD or hard drive with their project. You'll also want to run a clean system sweep for spyware. Windows Defender oughta cover that, and it's free also from www.microsoft.com if you need it. While you're connected to the internet, also check for any driver updates, but don't get 'feature rich' on the software. Base drivers only. Don't get a bunch of windows updates pertaining to security and network either, just slows down the system. Memory serving, my Paris machine uses something like 0%~1% CPU at idle and 80 Mbytes of memory before launching paris. That is Service Pack 1 and no internet/security updates... it 'never' sees the internet. FWIW, I'm using an AMD 1900+ in my Paris rig on 512 RAM. A 600w power supply was enough to run a UAD, 2 video cards and 3 EDS cards, if that helps you gauge power requirements.

> 2 What should I delete from the system so Paris can run smooth?

It's more about killing unneeded services. www.musicxp.net

> 3 What should I do or not do before installing Paris?

Make sure you have a solid system first. Buy an image program, image the disc. Update the image as you move along in the install process. Check with the motherboard manufacturer to see which PCI slots share IRQ's. Don't put an EDS card on with video IRQ slots (usually the AGP and the one next to it, but not always). Make sure the power supply is up to snuff for running the amount of EDS cards you plan to put in it. Use a 2nd hard drive for audio data. If you're not using stuff like the network, USB or firewire (or COM ports for that matter) disable them in the BIOS if it's onboard.

AAmusicxp isn't as easy to get at now... instead try this:

<http://www.blackviper.com/WinXP/servicecfg.htm>

Thanks for the advice and no a disc did not come with it. I just brought the Trend Micro Anti-virus plus Anti-spyware is this a good idea or not compared to the one you recommend.

That would be a DP/Pro hall reverb as ported by our guy Mike

>>
>>
>
>Which Ted can't hear because he's on a Mac :>(

>
>Note: is this an appropriate post for this section of the forum? I honestly
don't even know what the "general" area is (I only get IDEA.EMUEnsoniqPARIS,
whatever that is)... apologies if I should have posted to a different
area...

I went out last week to try a Larrivee acoustic at the local shop. The salesguy asked me a few questions about what I was looking for, pointed out a nice Larrivee LV-09E, but also invited me to try this Stonebridge 23CR.

I didn't know much about Stonebridge, but he told me a bit about them, and a later search on the web revealed a few things. Made in the Czech Republic (well known for luthiers making other stringed instruments like violins and cellos, but a relatively new comer to the world of acoustic guitars). The 23CR is solid rosewood back/sides, a very nice cedar top, ebony fingerboard, tusq saddle and nut. No electronics at all, so you have to account for the addition of <whatever> if you're going to compare it with the Larrive LV-09E.

First chord I strummed was stunning on the Stonebridge. Chimes like a piano. Just unbelievable. In comparison, the Larrivee sounded muffled (note that the Larrivee has a spruce top, which takes a bit longer to open up than the Stonebridge's cedar top, if I recall?).

Since I know little about acoustic guitars, and also since I don't have such good ears, I wanted to ask around and see what others know about Stonebridge. I'm sure its resale value would be a lot less than a Larrivee or a Taylor (can hardly find any on eBay or Craigslist). But "investment value" aside, and just for the sake of its quality and sound, any opinions out there?

I did find a few flaws with it: (1) When bending strings, the Stonebridge goes out of tune (whereas the Larrivee staid perfectly in tune). Is there a nut-tweaking approach to solving this? (2) No electronics at all, though many here would consider this an advantage,

br />

i.e. get the guitar you want, then add the electronics you want; (3) Very strong mids, which might be considered an advantage, I'm just not sure... sometimes it sounded a little nasal, but I wasn't playing my best, was in the middle of a showroom, and didn't spend much time.

Anyhow, if any of you out there have played a Stonebridge, I'd like to hear your opinions.

For the record, the 23CR's cost is \$1900, while the Larrivee LV-09E was \$2500. Once you add the electronics into the Stonebridge, you're about at the same cost (or close enough) to a sure-valued Larrivee.

Any input much appreciated...

DanI just bought a Winbook G35..at MicroCenter....nice deal...4gig ram,video card,pci slot, 4 usb,XP Pro...now which 8 channel interface to buy....

I would say to use your ears rather than caring about the brand.

You hear well enough to immediately hear the difference and you liked the Stonebridge better. Trust your instincts.

You might want to try a Taylor too.

DCRegarding the Taylor: I was looking at Larrivee because I was led to believe that Taylors are great, but overpriced. And the comments were along the lines of: "you can get much more guitar out of a Larrivee"...

Good points about the strings on the Stonebridge, and that they might have been incorrectly wound around the tuning peg.

I have full confidence that Chuck will send the mac as soon as he can, but just out of enthusiasm, I bought a copy of Codewarrior 4 off ebay yesterday. We'll see how it goes. Chuck said he had a hell of a time before he got the development mac.

All the best,

Mike

>Hi All,

I have a feeling I'm the only one running PARIS on a dual core CPU, but I
found a better way to do it.

There is utility available at: <http://support.microsoft.com/kb/252867>

that allows you to assign any driver on your system to a specific CPU. If
you set the paris driver to one cpu and set the Paris application to the
same CPU using the THG Task Assignment Manager, you can run Paris on any
CPU in your system without having C16 lockups. This will be awesome when
I can finally upgrade to a quad core. Yeeeeeehaw!!!

Mike :)Chuck is so old, who's afraid of him anymore ?

<http://www.toadking.com/6x9=42/Chuck%20Norris%20Action%20Figure.jpg>Oh, he may be aged,
but he is still fearsome.

Once the heavy bag in the workout room trembled at the approach of Chuck
Norris. Today, it is the colostomy bag in the downstairs bathroom that
trembles at the approach of Chuck Norris; point is, he still scares 'em.

>Guys,

I know you are all salivating.

I've spent 1.5 of the last three months in dubai. Now under crushing pressure at work and on the home front. Things are truly crazy, but I will try and get the machine out Friday.

Once Mike has the machine, it is as he was thinking, a fairly straightforward process to build. The main thing is that any new .bmps need to become .picts, which is probably not an issue, because from what I see mike is using the controls from stockfx. Some compiler directives need to be modified, and project references to the .dlls for linking need to be set up.

Being a guitar player since the 70's I been through many different brands and types of guitars and mainly acoustics. I have always been a peasant, so I could never afford anything extravagant. But my red flags would go up very high and fast if I was trying out an expensive guitar and it went out of tune just by a simple play. Yes, perhaps it could be the way the strings are wound and it could be a glitch in that guitar's heads, but I would immediately put it down and move on.

I personally never had a guitar go out of tune because of the way I strung it... never! When restringing a string and tuning, I adamantly bend, twist, pluck and abuse the little bugger at first. If after the first few times it don't stay in tune, it is most likely the heads... most likely cheap junk heads. I did have a Kramer that done this and i replaced the heads with good Gibson heads... never had the problem since... So I would move on to another guitar if I was trying it out and it won't stay in tune. By the way, I am a hard player... to where I have bloody fingers after a long sessions. Sometimes I don't know it until I have a bit more light and see spots all over.. lol. Yeah, i know, remind yourself not to let me play your guitar... I heard that a zillion times... rotf.

Anyway, if a company is going to charge top dollar for a guitar, it better perform top dollar anytime and anywhere. Period! Bottom line with me!

That said... and I am sure others will jump in here and try to dispute this... but I am not sure where some folks are getting their information or what they are playing, hearing and buying. Like I read an article in Musician's

Friend magazine recently about the old myth "cheap guitars"... in many cases, those days of the "cheap" Ibanez are over (as far as quality, playability and sound). They actually make really really good guitars these days. I am big fan and an owner of Gibson's! I wouldn't sell any of my Gibson's for the life of me... but I also own Ibanez too. My favorite is the EJ-160 John Lennon... I love this guitar! And I would match that up to any guitar over \$500 for sound and quality. I am not trying to start a guitar war thread... it just pickles me to think that the 70's, and perhaps 80's mentality of cheap-guitar is still out there with some products... Ibanez use to be the poor man's guitar. But I honestly believe their quality has improved and some guitars I know match up to the mor

mahogany back/sides instead of rosewood.

I agree that with acoustics in particular you just have to play a ton of them to find the right one, but in my experience the really expensive ones _do_ sound better. I've played a bunch of really crap sounding cheap acoustics while I've never heard a bad Collings or Breedlove. Doesn't mean the great sounding \$300 Takmine isn't out there, but I think the boutique guys are just a lot more selective about the wood they use.

Is the SPDIF file more open and clear?

>Oh, ok... No biggie... it just seemed your post was directed toward the original poster but replied to me... I was cornfused... lol.

And I have to correct myself about my EJ-160, it is an Epiphone, not an Ibanaz.

And I was wholeheartly referring to the Epiphone, not the Ibanez. Another example is the electric Les Paul... pick up a Epiphone Les Paul these days... my god! you can't tell it is not a real Gibson except for the label.

Vary cool bro... Glad to hear your doing better! Congratulations, DeeJ, on hitting the native DAW Holy Grail!

And congratulations on making it through a rough patch and pulling it off against steep odds. The professional benchmark over at our shop here isn't how well things go when they go well - it's about whether you can pull that rabbit out of your hat when they aren't.

- Kerry

>To me this argues against the idea of the \$300 dream Takamine. This would
argue that superior crafts(wo)manship can overcome inferior materials. One
thing you'll never get from a Seagull or a Takamine is an instrument maker
really working overtime to get the absolute best quality possible out of
the wood.

Funny thing? I was at the 2001 NAMM show so I probably saw this guitar,
though I don't remember it.
