Scroll down and there is a link to a free fully functional DX-VST
chainer which allows up to four DX plugs to be inserted into a
non-DX compliant host.

It's not often I've needed it in Paris, but it has bailed
me out a few times with older DX plugins which don't play nice.

Deej,
Macro Express has prevented the need for screen drags for me.
Are you using that? It's worth it's weight in gold.
Tom
"DJ" <notachance@net.net> wrote in message news:452e7f0a@linux...
I picked up two DVI/VGA adapters. They did not come with the cards. =
Also,
I've been testing some screen drags with big windows today. I'm =
getting 100%
CPU spikes on the PCI card when dragging a full sized mixer window at =
1200 x
1600 resolution (dammit!!! ;o(. This is sorta disappointing, but hey,
overall performance otherwiae, as in general stability of the driver, =
is
much, much improved. I'll be blaying around with my color settings and
performance settings to see if I can mitigate this some. I've =
conditioned
myself to be careful about screen dragging during tracking anyway, but =

in a
perfect world.....maybe something like a Colorgraphics Predator =
Pro
AGP? Not a lot of VRam on one of those and I'm not sure about the =
drivers
either....especially for win 9x.
