(859) 635-5762Hey,
Deej,
So your saying that if you at least keep a 8 to 16 channel analog Paris
setup you could have used it as a summing buss!!!
Doh

Chris

something. I have 3 of em. Also, a little trick about them..... You
have 8 pres but the first 2 are instrument level for plugging electric
guitars/bass guitars into. If you plug line level in they will sound
like shit (hissy) so you're down to 6 pres.....but wait.....If you
your line ins into the INSERTS for 1 & 2 on the back all is perfect
again. They didn't document that and I had to call the company.

Regarding latency, i got the 9652 rme and have all 3 going in the adats.
That's an expensive card \$500 or so but I know latency is a big deal.
Since the digimax doesn't have firewire you have to adat in so you
really want a card on the motherboard to do that with I think.

Deej for the stuff you do (mostly acoustic-oriented), you will proly end up loving the cleanliness of the RME's - I mean you can always dirty stuff up later, and if you're using that Neve Tape Sim box, you'll no doubt get plenty of veiling from that. There's color to be had - its just nice when you can start out pristine! Download Gene's fav - Color Tone Free Version for a start!

Neilsooo....this would be a fire and brimstone kinda' conversion?

You will have a similar experience if you choose to move to New Jersey.
GeneChris,
Thaks for th heads up.
I checked out the presonus forum and there is a lot of disappointment over
there for sure.
I particularlt dont like the CPU spiking with no apps open.
I will steer clear from this one until they get their drivers straightend
out. Man how can they sell that thing in that condition. I would be pissed.
I am going with the original setup I posted and you suggested.
1 motu 8 pre and 1 presonus digimax FS.
Maybe later after they fix th presonus firestudio I will trade in the Digimax
to get it.
Thx b
