.

Nuendo 3 might be an alternative (at least if you
can work a crossgrade/upgrade of some sort) - rock solid here, and you have
the control
room, if that's a reason you are going with Cubase 4 over SX 3.

I don't recall the rest of the thread, but I assume you trashed the C4 prefs
and started
a project from scratch? That has been know to cause all sorts of weirdness,
even it N3/SX3
but once they are rebuilt, problem solved. Once that's done, you can still
import your control room, key commands, setups etc).

I know what you mean - never a convenient time for problems like this. Give
me a call if I can help
in any way.

Regards,
Dedric

One thing we must absolutely show no tolerance for is bullying in high school and elementary. And today, girls bully about as well as boys.

One of the few things that is consistent in young mass murderers is having been bullied.

Would he have done this had he not been bullied? Who can say? He was pretty crazy. But it seems like an area that might make a difference.

DC

DCFriday night the 4th is bad for me till after 10P, then I'm up for cocktails...Pretty good all day Saturday the 5th till 7:30...

The following weekend is swamped for me...

-----=_NextPart_000_00C3_01C78349.09639180--What a guy huh?

Still, why did Kim release that to the public?

yikes!

We look up at celebrities and expect that they have these sparkling and oh-so-interesting lives...

Often the opposite is true.

DCAgreed! Absolutely. We'd do well in this country to divest ourselves of the notion that the establishment of a "pecking order" is somehow a natural and necessary function of group dynamics in children. Yes, such behavior shows up where it's allowed (or where it's expected). But it doesn't have to be this way.

My kids have had the good fortune to attend a small private school that has a core philosophy based on mutual respect and individual rights. Kids feel safe, happy, accepted, and the inevitable conflicts are worked through in a forthright way that often as not makes friends out of antagonists. I've been involved with this school for eleven years now, and have seen this positive approach succeed with sour and withdrawn children time and time again.

Not to suggest that simple justice will prevent mental illness -- but, man, it's a

make sure it is cl4. the 800 part won't mean much if its got a high CL.
Oh and I would use 2 2gig sticks. The board will take upto 8 gigs in 64.
2gig stick have come done allot in price.

>DJ, using rme 9652, i'm doing 3ms latency for normal tracking with 20%
cpu on the e6700. I can do .7ms and it uses 50%. Amazing really. 3ms
is great for tracking and has no perceptible delay for the average
studio setup.

OK, here's another possibility that looks much more flexible for the = short term:

MOBO:=20

http://www.atacom.com/program/print_html_new.cgi?cart_id=3D8_94775_205_201=_214_238&Pagecode=3DSEARCH_ALL&Item_code=3DMBKF_TYAN_NF_08&USER_ID=3Dwww

\$377.95 Great reviews on this on the Nuendo forum with UAD-1 cards in a = Magma (and it just so happens....;o)

I am also hearing some cool stuff about this mobo but don't know about = it's UAD-1 compatibility:

http://www.lagoom.com/ASUS_L1N64-SLI_WS_Dual_Socket_L1/L1N64-SLI_WS/parti=nfo-id-570627.html

\$325.00 - I've seen a thread where it says that this mobo will be AMD = Quad and Octo upgradable. I don't know about the Tyan, but if they have = the same ZIF, I can't imagine why it wouldn't be upgradable to Quad or = Octo as well.

CPU-2 of these:

http://www.newegg.com/product/product.asp?item=3DN82E1681910_3866

\$858.00 My thinking is that if a doubling of an existing processing unit = produces a 40% increase of performance according to the Steiny forums, = then, in theory, if I doubled my 5.2GHz opteron 185, and took 40% of the = second 5.2 GHz CPU, my system would be running at a theoretical 7.26GHz

Now if I take that same scaling model and apply it to the Opteron 1207, = I'm running the first two cores at 6GHz. Add the second CPU and assume = that 40% of that 6Ghz for the second two cores would actually be = available in Cubase 4 for processing duties and, in theory I'm looking = at having around 8.4GHz available for use in Cubase 4.

Divide my existing 5.2GHz CPU by 8.4GHz and we're looking at a = theoretical 62% increase in processing power. That's pretty significant = and might provide me the extra horses to do the low latency full time = thing while monitoring with FX if I didn

eed to be 64 bit eventually so there's a \$2k =
expense, no matter how you cut it. So why upgrade PCI cards to PCIe if I =
can get a PCIe chassis that will hold all my PCI cards and allow them to =
interface PCIe anyway?

The reason I'm tempted to make the move now (besides wanting the =
horsepower) is that although the prices of the CPU's will be coming down =
over the next few months, so will the price I'll be able to get for my =
Magma's since they are 32 bit units (although 2 x of them are capable of =
integrating the PCIe host card so this gives them a little added value =
on EBay).

Any thoughts?

> Obviously the better the video card the better the performance. Beryl (mentioned
in the other post) pretty much _is_ Compiz, it's a fork of it though if i
recall they've sorted things out and are planning on merging back together
sometime this year. IMHO Beryl would be the way to go, but it might not work
on your laptop. I tried it just for kicks and the integrated video no my
i915 based chipset didn't allow for much.

Nevertheless, it's great tech, and really stable. It's not some shaky skin
over the windowing system, it's the real deal. If any of the big boys (Cubase,

Live, etc) announced they would do a linux version I'd be there in a heartbeat.

Finally, check out Ubuntu Studio. It's still in its infancy but it's essentially Feisty with all of the best audio/video/graphic design apps pre-installed and configured. I don't know if it will even ever happen but it's worth keeping an eye on it.

In researching the Tyan S2915 mobo, I ran across this thread
<http://forums.vr-zone.com/showthread.php?t=87410>

and I also ran across this:

<http://blogs.zdnet.com/Berlind/?p=366>

What I'm wondering is if this mobo will be quad core compatible and what is
the most powerful CPU it will currently allow.

Opterons are very confusing...there are so many of them by so many different

Chris,

Thank you so much. I'll look into Raid 0. I like the idea of being
able to use my IDE drives as backup for the Raid!

In general, I'm only playing back this many tracks for mixes, and it's
an extreme example. When mix clients use 96k, I want a system that
doesn't sputter when trying to handle it (which my P4 2.53 does now with
lots of track freezing).

I'll see if I can swing the Quad -- frankly most of the plugins I want
to run are CPU hungry... so I guess I don't really have a choice there!
lol...

Thanks,

Graham

Oil Change instructions for Women:

- 1) Pull up to Jiffy Lube when the mileage reaches
3000 miles since the last
oil change.
- 2) Drink a cup of coffee
- 3) 15 minutes later, write a check and leave with a

properly maintained
vehicle.

Money spent:
Oil Change: \$20.00
Coffee: \$1.00
Total: \$21.00

Oil Change instructions for men:

- 1) Wait until Saturday, drive to auto parts store and buy a case of oil, filter, kitty litter, hand cleaner and a scented tree, write a check for \$50.00.
- 2) Stop by 7/11 and buy a case of beer, write a check for \$20, drive home.
- 3) Open a beer and drink it.
- 4) Jack car up. Spend 30 minutes looking for jack stands.
- 5) Find jack stands under kid's pedal car.
- 6) In frustration, open another beer and drink it.
- 7) Place drain pan under engine.
- 8) Look for 9/16 box end wrench.
- 9) Give up and use crescent wrench.
- 10) Unscrew drain plug.
- 11) Drop drain plug in pan of hot oil: splash hot oil on you in process. Cuss.
- 12) Crawl out from under car to wipe hot oil off of face and arms. Throw kitty litter on spilled oil.
- 13) Have another beer while watching oil drain.
- 14) Spend 30 minutes looking for oil filter wrench.
- 15) Give up; crawl under car and hammer a screwdriver through oil filter and twist off.
- 16) Crawl out from under car with dripping oil filter splashing oil everywhere from holes. Cleverly hide old oil filter among trash in trash can to avoid environmental penalties. Drink a beer.
- 17) Install new oil filter making sure to apply a thin coat of oil to gasket surface.
- 18) Dump first quart of fresh oil into engine.
- 19) Remember drain plug from step 11.
- 20) Hurry to find drain plug in drain pan.
- 21) Drink beer.
- 22) Discover that first quart of fresh oil is now on the floor. Throw kitty

litter on oil spill.

23) Get drain plug back in with only a minor spill.

Drink beer.

24) Crawl under car getting kitty litter into eyes.

Wipe eyes with oily rag

used to clean drain plug. Slip with stupid crescent

wrench tightening drain

plug and bang knuckles on frame removing any excess

skin between knuckles

and frame.

25) Begin cussing fit.

26) Throw stupid crescent wrench.

27) Cuss for additional 5 minutes because wrench hit

bowling trophy.

28) Beer.

29) Clean up hands and bandage as required to stop

blood flow.

30) Beer.

31) Dump in five fresh quarts of oil.

32) Beer.

33) Lower car from jack stands.

34) Move car back to apply more kitty litter to

fresh oil spilled during any

missed steps.

35) Beer.

36) Test drive car.

37) Get pulled over: arrested for dri ving under the

influence.

38) Car gets impounded.

39) Call loving wife, make bail.

40) 12 hours later, get car from impound yard.

Money spent:

Parts \$50.00

DUI \$2500.00

Impound fee \$75.00

Bail \$1500.00

Beer \$20.00

Total \$4,145.00

chrisl@adkproaudio.comHi DJ,

I'm sure all the Chinese, Taiwanese, Malaysian and Indian wage slaves that make iPods, mac, ITV, iPhones will be able to sleep at night knowing that Apple cares so much for the world.....

Apple will now only be selling them \$2 a bowl organic rice at the company general store which they can buy with their \$1 a day income.

Sure hope Microsoft don't rip off this idea from Apple too...

www.adkproaudio.com

chrisl@adkproaudio.comHi there,

Thought you guys might be interested in this Tiger Direct deal. I just rec'd mine from them last week.

http://www.techbargains.com/news_displayitem.cfm/88494

Cheers,

JonHave you tried:

- 1 - Routing something OTHER than Insert Sends to these ADAT outputs (Main Outs, Auxes etc)?
- 2 - Switching the EDS card / MEC assignment in the Master Mixer (ie, if the troublesome ADAT outs are on MEC1 connected to Submix 1 playing off CardA, does the same problem exist when you assign MEC1 / CardA to Submix 2 etc)
- 3 - Changing your EDS cards (basically, label them, pull them out, and put them in the same PCI slots, in a different order - put a different EDS card in the slot for the ADAT MEC).

I had a similar problem, but it was ADAT OUT 3 and 4 on MEC1 connected to EDS Card A in a three card system on WinME. On this same MEC, there were a total of (2) ADAT, (2) 8-input, (2) 8-output.

I had the same symptoms though - swapped ADAT cards and OUT 3 and 4 still didn't wor, but the "bad" card suddenly worked in a different hole. The "good" card displayed the same problem as the "bad" one.

I yanked and moved the EDS cards in my system and connected the MEC to a different Card A and the problem went away with both the original ADAT and the swapped ADAT.

I concluded it to be an EDS Insert problem on a specific EDS card - not an OS thing. Something about the way the Insert Sends were handled on that EDS card. Could be a loose connection on a board, a bad or dying chip etc. I never bothered to check if you could route Auxes or Mains to the same questionable outputs (and if I couldn't, it would be a bigger problem).

>Hi Sarah,

```

Thanks for giving me the benefit of the doubt. Here is why Scientology is opposed to psychiatry: While Scientology is not used primarily for fixing up psychotic people, we certainly have the tools to do so. You cannot improve a person by addressing him or her as an animal, a bag of

chemicals or a piece of meat. Hubbard discovered that the only approach which actually made anyone better was to address the individual as a spiritual being.

Knowing that and seeing how psychiatry addresses people like animals with such horrendously destructive "treatment" we can not stand by and ignore it. Therefore we do everything we can to discourage it. By the way, the hospital 5 miles from my house has a very active electro convulsive therapy department. I well understand your belief that it must be ancient history as it so incredibly inhumane, but believe it - they are still doing it.

You might find a movie I saw on YouTube recently enlightening.

<http://www.youtube.com/watch?v=KFbs8s3VI6M>

It's of a woman who wrote a book entitled "Confessions of an RX Drug Pusher", who worked as a drug company sales rep for 15 years before she realized what she was really selling. Here's a quote:

"...So I started to question. There were a group of people that were out rallying one time in front of one of the buildings that we were

"So that kind of became my, you know, little tag line for anybody that spoke out against psychiatric drugs, because I knew then that you could

pharmaceutical industry was promoting that they were a cult that was

Shortly after WW2, at its annual convention, the American Psychiatric Assoc held a meeting and outlined their goals for America. One of the primary goals was to create a "value neutral society". That means a society in which there is no right or wrong, no one judges another, there are no values. That goal has in many way come to pass. The term, "don't judge me" is common in society, yet if we don't use judgment in dealing with others we are truly fools. In law sanity itself is defined by the ability to tell right from wrong.

So let's see the results: Jails are over flowing. Millions of people take antipsychotic drugs just to cope. CHILDREN are given class 1 (Class A?, you would know) narcotics. As our technologies improve our children get a poorer education. Look at our schools, they now have psychologists on staff. Back when children all learned to read there were none. I could give dozens of examples of what a value neutral society means to

the detriment of us all, and I bet you could too.

Do you still wonder why I and other Scientologists are against psychiatry?

rds you can buy, and vouchers you can get, but remember, a maximum of four UAD DSP cards can be used per computer.

Promotion expires June 30th, 2007 at midnight, Pacific time.

UAD-1 to UAD-1e Cross Grade - EXTENDED!

UA is offering a limited time Cross Grade Promotion for UAD-1 users. Purchase and register a new UAD-1e from an authorized UA dealer, and get an additional UA store voucher (beyond the one that comes in the box) towards your next Powered Plug-In Purchase, and KEEP or sell your UAD-1.

- a.. Buy a new Express PAK, get an additional UAD\$100 voucher
 - b.. Buy a new Expert PAK, get an additional UAD\$250 voucher
 - c.. Buy a new Extreme PAK, get an additional UAD\$250 voucher
- Insiders tips

a.. You may cross grade as many times as you like, without limit, until the promo expires, as long as a PCI UAD-1 card remains in your account

b.. ANY UA UAD-1 changes to a Project PAK if you choose to sell it and keep your plug-in licenses (Mackie cards also have 1176LN & LA-2A). Please read our UAD-1 transfer policy

c.. These vouchers do not expire!
The UAD-1e can be integrated seamlessly with your UAD-1 cards, up to four

total per system. Yes- all of your existing plug-in authorizations will work with your new UAD-1e card.

Promotion ends June 30th 11.59PST

Morgan

Eastcoast Music Mall

morganp@ntplx.netI think you probably bought those from me, maybe.....the only thing I'm sure about is that the price was \$4000.00 and I haven't received the money yet.

;o)

(seriously though....I have checked my stuff and though we talked about a Magma a while back, it never happened. You have made me paranoid though and now I'm gonna do a system backup.)
