>Got 2 ADA8000's... I think I was one of the first to jump on them here in
the NG from the posting dates. Have had zero trouble with them. Only real
complaint I've had is that the detent gains are NOT matched channel to
channel. That's a QC issue IMO, but a livable one if you're not trying to
make it a completely repeatable gain setting across channels, or do a lot of

critical stereo input mic'ing. For stereo stuff that's touchy, I don't use the ADA, but I'm not sure those pres are where I'd go for critical input stereo anyway.

I also noted the earlier versions/releases of them had tighter tolerances to my ears.
