br />

We have 2 G5's (Dual, Quad) 1 Dual G4(877), running Pro Tools HD3(plus), Digital Performer(4x), Logic Audio 7.2. 2 PC's running Gigasudio3 (Orchestral) & V-stack (Massive amount of VSTi's) ..
1 Pc for Neundo/Cubase, Acid, Sequoia..AND I have a Paris System, that everyone loves ...

Then, there's the SSL (56channels) G/E series eqs and comps.(A- Room) B Room (48 channel Pro Control.. 2 individual pre-production suites (Running Pro Tools HD/Logic Audio), MPC and a host of Keyboards..

It's a great musical invironment...Then, there's the full blown Video Production Suite.. !! Yikes!!

Last time I went up stairs, they had a Euphonics Rep in ??????

 >I'm not talking about unquestioned anything. I'm talking about common sense.

Many liberal Democrats:

1. believe we are not in a war.....or
2. believe we are in a war we can't win.....and/or
3. believe that it's OK to divulge war strategy to our enemies in the name of freedom of speech.....and/or
4. don't realize that if we lose this war, their freedom of speech and basically every other liberal cause that is dear to them will be toast and

they will be the first to be slaughtered by those that they currently unwittingly (or willingly, for political purposes) aid and abet.

More and more weasel'esque Republicans are starting to echo this in order to save their political arsses. The bottom line is that to win a fight, you need to be unified and you need to go to any lengths to get it over with quickly. This current situation in Iraq would have never happened if Clinton hadn't lived by the polls and not let an existing war drag on for 10 years and it's highly likely, IMHO, that things would be very different today if, subsequent to the disclosure of the perfidious behaviour of our "allies" that this country had united even further and realized that the threat we face is not just from the Islamic fundamentalists, but from the gutless behaviour of their own socialist/liberal role models worldwide. Our enemies, having been presented with with a historic precedent, have been encouraged to fight on because history has proven to them (and in doing so, Bin Ladin has been validated) that all they need to do is to hang on until we lose our will to fight and therefore defeat ourselves.

.....thus, the lemming analogy.

;o)

I like what Chuck is working on as well.
If it could automatically figure it out the latency would be awesome.
If you can just type in a latency you knew was greater than the largest it
would be cool instead of trying to figure out what the actual latency is.

"I'm talking about common sense."

Tell me again how Clinton is responsible for the war in Iraq.XTC is the best. They released their

best album in years with "Apple Venus".
Gorgeous.

I think they've recently called it quits after all these years.

Love love love them. Andy is my hero. Lyrics like nobody else.

"Summers Cauldron" from "Skylarking". That says it best. Just listen to that for a good sampling.

Mobile or web, this is the problem right now: Content is so ubiquitous & so easily obtainable, that it's becoming worthless - whether it's a movie or a TV show or a song or an album... I don't see how a business model where the producers of the content (Google is essentially robbing every source of content, when you think about it) don't get paid for it can be sustainable.

NeilHeh, gotcha. You're talking about them thar UNPATRIOTIC fools who won't give up their personal liberties to fall lock step behind the, er, head fool, eh? :^)

I dunno, that sort of blatant spin isn't working as well these days.

We're down to around 25% or so who think Bush, Cheney and Rumsfeld are geniuses, or are at least taking enough of Scaife's money to say so.

For anyone in that boat, I recommend constant listening to talk radio windbags and cable blather so you can be reinforced in the comforting ability to blame everyone else for the problems. Especially anyone who values civil liberties or social responsibility, or who think there might be human beings who are Islamic. Commies! Liberals! Freaks!

In the Scaife bunch, the buck stops with anyone who disagrees with the neocon con job. The rare time the buck stops with the Whitehouse is usually in a sentence that includes the word "Clinton." Very convenient but inadequate.

Sure there are a few facts in there to spice things up, but overall that telling of the story is as full of fantasy as any joke with Democrats and flying saucers.

It's our right as Americans to have those misguided notions. Meanwhile I'll feel free to disagree with both the current administration where they fail to think things through, and with anyone who thinks I don't have the right to see that they are, by and large, leading my country down the wrong path and over a cliff.

Not to defend the Democrats or anything because there is plenty of blame to go around with administrations in both parties back at least to the early part of the century. But especially with the administration we have now.

BTW, here's some provocative free speech that may annoy you, although a few entries might amuse you. Remember, it's probably a joke:

here are a few extenuating circumstances.

200 years of tribal warring.

Sykes-Picot Agreement.

The British Land Settlement Act.

Rashid Ali al-Kaylani prime minister of Iraq who was collaborating with the German Nazis (check the history of the Harriman Bank and you will find an interesting link between Prescott Bush and Rashid Ali al-Kaylani.)

Joining the Arab League.

The Baghdad Pact in 1956 with the USA.

The Iraq Petroleum Company (a British company) taking 90% of the oil profits from the Iraq people.

In 1979 Saddam took control.. That did make us happy since we were mad at Iran and Saddam hated Iran.

Mass chemical weapons attack on the city of Halabja in March 1988, followed in trade credits to Iraq ten days after condemning the

Tom, it is simple. Select in the editor what tracks you want to solo. =
You can use control+k to cut at the time line if you have a specific =
section you want. With those highlighted, go to the Control 16 and there =
is a specific button for play selected it. That's it. Just undo your =
cuts once you're done here with a control+z.=20

Dimitrios,
I'm still liking it as much as anything else I've heard.

The grouping feature is just another plus although it must be a pain to use - opening plugins etc..

Have you checked out Brian's technique of soloing within a Paris editor? I never figured it out but he makes it look simple like everything else..

Tom

"Dimitrios" <musurgio@otenet.gr> wrote in message = news:45b468da\$1@linux...

Hi,

Automatic figuring out of actual latency is a "impossible" task.

Although a plug-in reports its latency to the host, a plug-in cannot = request

this value from another plug-in !

Thats why we are somehow doomed for automatic latency detection.

But this hand typing of latency for a single plugin is a great = feature !!

Regards,
Dimitrios
