Thanks for your responses to my questions... I have 1 gig of memory assigned to Paris. Don't the plugins get their memory from Paris? Is 1 gig too much?

Sounds good too DJ.  
My concern also is every review for ribbon mics included a recommendation for a real good mic pre. I have DBX 586 tube pres. Not the best by a long

shot.

I have never really been pleased with these pres.

If I were to sell them what mic pres would you guys recommend I replace them with for about the same amount of money and channels. 4 channels. With phantom power.

Thanks,  
b

As to your preamp question, Grace now makes a 101 specifically for ribbon mics - they're a little under \$600 street price. The 101's are about as clean & uncolored of a mic pre as you can get without stepping up in cash big-time.
