The Alesis Matica 900 has 270W/CH at 8 ohms and runs quiet and cool. Though discontinued, they can be found pretty easily and at good prices. If you add a sub, be sure to use a powered sub.;o)

>uggg.The more I use it the more I like it. I haven't gotten really deep into it,  
it has a cool feature where you can select different emulations of the EQ

section for up to seven bands. So you can have the low end shelf from a Focusrite and the mid range band from a Pultec and the high from a Neve console.

I've been planning on running some drums and vox through the emulations that are on both the UAD and the LM. I'll post a link that here when I get around to it.

hese files  
exported with bar numbers. I load them into Wavelab as a montage or just  
burn em to CD. Worked killer. Now the piano students have nice voice intros  
to each song, and the songs at two tempos with both left and right hands.  
Thanks Cubase !!!

```
voice.....main_intro....song1_intro.....
.....song1_change_info.....song2_intro
tempo120.....song1..left.
```
