Mike,
Ensoniq needed forward marketing thinkers like yourself.
We all know where they ended up.

The pitch shift element is part of what I like about the
DP4 Hall. I'll add a chorus to the DP Pro Hall and cover the
same sound while retaining its transparency.

Got any pre delay hanging around?
T.

"Mike Audet" <mike@...> wrote in message news:482c52fb\$1@linux...

Hi Tom,=20

I love the DP/4 Hall, but the DP/PRO hall actually is a pretty nice =
step
up. Having said that, It's good in a mix to use various sound spaces, =
so

they are both useful. It really depends what you are after, too. The DP/4 Hall sounds more like a real hall, while the DP/Pro hall sounds more transparent - the sound just gets bigger and wider without necessarily noticing where the sound is. I just can't believe that Ensoniq didn't release these years ago. These algos would have given them a huge advantage vs. Pro Tools at the time. It was just a huge wasted opportunity. =20

Oh well. They're here now. :)

-----=_NextPart_000_0048_01C8B687.2DA753C0--Hi Mike,
That's great news and thank you for all the hard work.
I would love to use these new effects, but the catch of course is
I'm on a Mac. Any news on that front?
cheers,
Mike

I'm finally getting back into my studio (after a couple of tough years essentially
away), and these new plugs look really cool.

And thanks for helping to keep the flame going.

>Hey Guys,

As I have posted before I am using Win 98, But for the last month I have been looking for a computer that has XP, and I think I have found a gem. My wife is a RN and about a year ago she became a traveling RN. Right now she is working in Columbia, SC at The Richland Palmetto Health Hospital. So one night she asked some of the other nurses if they knew where the Surplus

to give her direction to the store, when another nurse joined in on the conversation

So with all that said, will this work.

AMD Athlon(tm) XP 2100 + 1.73 GHz
512 MB of Ram 1 AGP Slot 5 PCI Slot

Man! what a find. I Think

If this will work:

- 1 Should I run an Antivirus before installing Paris and then delete the software? (Paris use only)
 - 2 What should I delete from the system so Paris can run smooth?
 - 3 What should I do or not do before installing Paris?
