choose "Disable" to disable error reporting.

Disable Power Management - Power management can be disabled by going to "Always On" and set "System Standby", "Turn off hard disks" and "Turn off monitor" to "Never".

Disable Screen Savers - Screen savers can cause unexpected performance glitches, so you'll want to disable them. Disable any screen savers by

Set graphic acceleration to full - You can do this by going to your desktop, right clicking and clicking on "Properties" then on "Settings", "Advanced" and the "Performance" tab. Make sure the Hardware Acceleration slider is s
