e locks up & I have to shut it down & restart  
(just the app, not the whole computer).

Standing still there's no problem, but if I'm in playback &  
trying them out is is when it happens - usually on the removal  
of the plugin from the channel (stereo/mono, track/group  
channel, 2-buss - doesn't matter).

Some of 'em sound pretty good, tho, I must say!

It is possible that the death of SSC may have made work on a new DAW product  
possible, or that enough time has past to make non-compete contractual agreements  
void. Edmund might have done a bunch of work after 3.0 and then been unable  
to sell it. Who knows?This is a multi-part message in MIME format.

I have donated a small morsel of funds to the Mike Audet Project  
at [mike AT mikeaudet dot com](mailto:mike@mikeaudet.com) .  
I know Mike has plans to do many things. It is nice to know new things=20  
still materialize for Paris after it has been long forgotten by most. =20

All that can should take part in Mike's effort by donating a little  
something. If we all do, it might add up to something. He's working =  
very  
hard at it.  
Tom
