The key is to know the ones to regard, and the ones to take with a big grain of salt. :-)

The demos sound good, but imho, a 480, 960, TC or KSP8 impulse convolution sounds clearer and smoother (e.g. more like the real thing). Breverb sounds a bit foggy and smeared to me, even for the marketing hype. Certainly a step up from plugin reverbs in years past, but standards are higher now.

Dedric

It's in range with SonitusFX reverb - better than most, but against
