Well, I've discovered that you can't really have too many Pultecs or CPU cycles, so it's always a good idea to find an excuse to upgrade.....;oPIt's in the xp effects subsystem thingy if I'm not wrong.

It's funny and sad at the same time, this guy used to sell out arenas. In his book Crazy From The Heat, he tells what really happened with VH and the reunion. He also talks about how he is constantly recording all different genres of music with people from all genres of music, from country, blues, jazz to motown, etc. That book is an interesting read, and a few good laughs.

It's too bad he hasn't been able to do much with his records since VH days, because some of the stuff is great. The DLR Band record has some rippin

tunes on it. There is some really great playing on it.

gt;One connection from the Lucid to each of the MECs. Be sure to select clock
>in the project file.

Dont forget to write the command in the "Paris config" file:
UseHouseSync=1

APVery sorry to hear. I was very traumatized when my dad passed. God bless,
Edna
