>Deej,

After reading your story, I wondered why don't you pick up an analog mixer?
Paris is cool and all, but if you like editing in SX and you're just using
Paris for the summing, a mixer would be much more hands on and convenient
with all the studio infrastructure stuff it comes with. Just imagine
drivving a vintage API 16 channel board. 16 sweet EQs and pres, my man.
Prolly have some comps too. And you could drop in some OSA pres. I'm
drooling.

Another thought: Doesn't SX do outboard F/X routing and compensation now?
That plus a nice SPL mix buss should do everything Paris is giving you.

Or sell it all and move up to Samplitude... ;-)
