Rod,  
You're right it is performing an undo. I think if the Editor window  
if I last unselected the tracks the undo would just be to select the =  
track  
but not move it in time. =20

Feature,

I think it's performing an "undo". Did you move that track before you =

ill open up your IRQ options with a little trial and error.

Tom

"Pete Ruthenburg" <ruthenburg@sbcglobal.net> wrote in message =  
news:444e4a2b\$1@linux...

So I go to open PARIS and get an error occured while reading  
default project.A new empty project will be created.There are not  
enough free resources.Then I get an unhandled exception error and  
have to restart the comp.

I'm getting this after taking out an EDS card and putting an EMU  
0404 card in its spot.

Heres what I've got in the comp:

PCI 1 UAD-1 IRQ 18  
PCI 2 EMU 0404 IRQ 21  
PCI 3 EDS IRQ 22  
PCI 4 EDS IRQ 16  
PCI 5 EDS IRQ 18

Those IRQ assignments were working with the EDS in place where  
the EMU is now.Any ideas?SHould I move the EMU card?

Should I finally hook up the Magma 13 slot I've been lazy with  
and not hooked up.

Thamks peeps,  
Pete
