ow, in the Devices>Midi Device Manager>Device =
Installer=20

lists all
the (most) keyboards and modules. This might be =
what you're=20

looking
for.

also Devices>Device Setup what default midi =
input=20

shows up

in the arrange window when you select the midi track =
the=20

output should
be the midi port and the input should be the=20

instrument

well i've got to get back out to the studio to see =
why i can=20

step
input from the pro 88 but not real time....hell it=20
worked
yesterday...go figure.
