Hi, =

Tom.
I'm at a loss.
In the absense of a Steinberg/vstplugins =
folder,=20
the install creates a folder
in the Program Files directory =
called=20
"solid state logic". It dumps the SSL
LMC-1.dll there.
I =
just moved=20
it, as you did , into my Paris VST plugins folder,
and it =
showed=20
up.
Are you sure you moved it to the very folder that Paris's =
config=20

is pointing to?
I assume you are using =
XP.

My personal experience only, but when I've used Ghost to clone my system
drive, Paris registration has been fine.

ve been payable since February 1, 1996. =
If your=20
music has been
played on the Internet since that date, you are =
entitled to=20
a share of the
royalties.

On December 15, 2006, any =
royalties that=20
are unclaimed for performances up
through March 31, 2000 WILL BE=20
FORFEITED.

If you, as an individual or as a member of a =
recording=20
group, are not
registered with SoundExchange by December 15, 2006, =
you will=20
lose all rights
to your royalties earned before March 31,=20
2000.

There are thousands of identified artists who will lose =
these=20
royalties
unless they act before the deadline. SoundExchange has =
listed=20
these
 "unfound" artists on their website.

Take=20
the time to read the list. If you are on it, follow the =
instructions
for=20
filing a claim. It costs you nothing and it does not take much time. =
If
you=20

register now, you will receive the unclaimed royalties and will=20
received
future royalties automatically.

Friends and =
families of=20
recording artists should also check the list. If you

there,=20
PLEASE LET THEM KNOW IMMEDIATELY. You will note that
there are a =

>Hi all,

since 15 month I haven't used my PARIS - I still love it, but I'm not recording live band stuff at the moment, I've got my Cubase/RME mobile stuff that I use with my laptop alot, and I need money. So I think about selling, but I'm still kinda undecided ...

Anyway, what do you guys think would be a decent price for the whole rig?

Here's what I've got:

PARIS v3 Software

2 EDS-1000 cards

1 Control 16 (black)

1 MEC (black)

1 8-In Card (black)

1 ADAT Card (black)

1 PC, Windows ME, with Athlon 1 GHz, 384 MB RAM and 30 GB HD (not 100% sure about the RAM and HD size, could be more; fan is quite loud)

PARIS is installed on the PC and ready to go. Everything is in good condition. MEC and C-16 come in their original boxes, EDS cards mounted in the PC, MEC cards mounted in the MEC. I would not sell pieces, only the whole rig.

Once I have decid

Or, if you've already set yourself up for tracking & payment of
online listens (through CDBaby, for example?), then you're
already being paid for it, so your name wouldn't be on that
list, since it's just an UNpaid royalties, list, yes?

My stuff has gotten hundreds of streaming listens, mostly
through Rhapsody & MusicNet, but they only pay about a
penny apiece, so I wonder how much in "royalties" these guys are
really talking about?

lol
