Dave,
That sounds right from what I've learned from Brian, Chris L.
and a few others around here. Deej?

ilto:1@linux..." target="_blank">1@linux...
I would get error messages, or Paris would lock up. Once I=20
re-installed, it was fine. It seems to me that Paris takes=20
a hardware inventory the first time it runs.... but I don't=20
know for sure.

David.

the HUBI port, and output MIDI
CLOCK through the 4x4 out.
Set the software sequence clock source to external MTC.
Set your Roland or ZR76 clock to external MIDI.
PARIS starts the software sequencer, which starts the hardware sequencer.
It's a little more lag time, but as long as they all synch, it should do the
trick.
