---=\_linux47dbcb9e--I sincerely hope Spitzer is run through the ringer.

Also, I don't have a problem with anyone doing anything they please with another consenting adult. I DO have a problem with sanctimonious 'family values' types (which family? mine is kinda weird, can we use our values?) lording their morality over me and then not even following it themselves. I like to drink, gamble, and chase women, but I don't expect anyone else to do the same unless they want to. If I were caught in church on a Friday night praying for my eternal soul I'd wouldn't begrudge anyone a little ball breaking session.

>Hi All,

I want to thank everyone who has supported my efforts with the PARIS plugins.  
20 People have donated over 10 plugins. My plan is to do at least 3 more  
before turning my attention to the driver.

I also hope to start releasing Mac plugins as soon as possible. With any luck, that will be within a month.

I really hope these have meant something to people. I've had a great time working on them, and they really are a dream come true for me - both having them and making them.

The Amp was the hardest one yet. took probably around 75 hours to finish, and it built on countless hours learning about the plugins before. It's still got me wondering why a MOV command from main memory into a register done by the logic unit is 4 times as slow (2 bits offset) as compared to the same MOV command by the Math unit. That led to a mean bug that took forever to track down.

Anyway, it just doesn't feel right spending that kind of time and watching dozens and dozens of copies get downloaded when only 6 people cared enough to pay anything for it. And of those 6, one person doesn't own PARIS anymore, and another is waiting for a Mac version. So, of all the people who downloaded and hopefully used the code, only 4 people gave anything for it.

Anyway, the download links are gone. You can still pay anything you want - there are no set prices. But, access to the code will require sending "something." If this upsets anyone, I apologize. I probably set myself up for this. I can be a bit naive.

All the best,

MikeHey DJ, although somewhat pricey, this new SSL Controller does handle HARDWARE integration really nice..Take a look.
