Most of the rest is pretty awesome, IMO, though I don't like any of their
albums start to finish. Colin's songs are not always my favorites, and Andy
always had a few duds here and there.

"Wasp Star" is a textbook case of why PODs suck so bad....

But "Black Sea", "English Settlement", "Skylarking" and "Apple Venus" are borderedline impeccable. Just amazing music.

"Oranges and Lemons" is a close runner-up, and "Nonesuch" had some awesome moments.

hate the Mac platform, or people that want revenge. It's not a problem right now. So who is really putting up the money and time for this web site. Notice that MS is launching Vista, and trying to claim that it is secure. Now there is a campaign to say that Mac OSX is not secure. It's a totally exaggerated claim. Mac users do not have the security problems window users have, not even close.

My post was tung and cheek, even though I'm serious. It was kind of a kick back to Dedric's uninvited comment "Yeah Logic sucks", and that's cool by me. We all have a right to our opinion. We all jump in! It's Ok. Yes your right, it was rude;)

It was all in fun. At lease Dedric got it.

Rod,
Make a CD in itunes (already installed?) and burn a CD of wavs.

it any other way in itunes. I think it's part of their copy protection =
thing.?

They will put a limit on the number of CDs you can burn too. Nice of =

Huh? You didn't read my whole post, or completely missed the joke - that
line was complete sarcasm.
I used to be a Logic user until Apple pulled the plug on PC support - that's
what I was making a dig at. I actually still
really like Logic - great program - though it doesn't handle audio editing
the way I prefer. No Logic doesn't suck in the least,
but maybe my humor does.

Here's the whole thing in context:

"Logic does suck.
Why'd it leave me here alone?

I searched the world over and thought I'd found true love;
It met an Apple and iPfft, it was gone."

In case this last part was missed since it explains the "Logic sucks" joke,
it's a parody of a Hee Haw tune.
Guess I'm dating myself now (hey, I was a kid then at least
