

It sounds like a lot, but the entire process for a large song only takes a minute or so on a fast computer.

-----=_NextPart_000_0014_01C704D2.C570DD60--this is the 800lb gorilla to be sure, but as far as Franklin oes, would he have advocated exercising one's freedom to walk into a plague infested area, simply because it is ones' right to travel freely? Sure, you can do it. and you will likely die. What we are facing is much more akin to a plague than any conventional threat and it should be treated like one. In order to do this it must be detected and prevented. the only way to do this is by forensic means..but this particular plague has intelligence so letting it know what you are doing to prevent it will cause it to mutate much faster and more effectively than any microbe could ever do.
