Cool about your new bass. Did you say it's a Warwick, an import, nice. I dig that Warwick growl too. Don't ever get rid of the Fender Jazz, Jaco would be dissapointed. Are you playing fretless? Just got back from Miami, working on an arrangement for Othello Molineaux's new cd. It's a piece for a steel drum orchestra, well, he and I are playing the parts for the recording. Toots is supposed to play on it.

Global warming is boring man. Me a paranoid, knee jerk reactionary, scientific scapegoater? I don't even know what that is, but I live in the northeast and would welcome the tropics up here :-) I'm tired of friggin' winter.

Peace,
Rich

>Rod, I'm not using an obsolete Opcode that uses the printer port, but I am

using an obsolete MOTU MTP A/V which uses the printer port. I've been trying to find an XP driver for it, but haven't had any luck yet. MOTU hasn't gotten back to me yet about whether it will work or not in XP.

Thank you also for working to keep PARIS alive. I look forward to reading your blog. Let me know if I can help at all.

Cheers!

Mike

><http://ensoniqparis.blogspot.com/>I have an old pocket express, and if I remember right it uses a
'multi'
driver of some sort and wasn't particularly clear with out some reading that
this is the right driver. Works on SP2 XP just fine, you just need to DL the
right port version, LPT or midi for the Timeworks app.
