<http://news.harmony-central.com/Newp/2007/Focusrite-ISA-828.html>The Helios eq is available in
version 4.6, which actually seem VERY stable,
so your good to go on that. The Neve 88RS and the LA3A are what's new in
4.7

Download 4.6 and get the Helio eq. render away.

Oh yeah, there seem to be no other issues with 4.7 other than not being able
to render.

I'm still holding out for someone to have magic bullet for the 4.7 problem.

Rod

Nikola Tesla? lol

:)Agreeing with everything everyone's said to this point in the
thread... besides, if you can come up with a touch-sensitive
system that can also replace some legacy (console-oriented)
systems that are no longer supported you can make a few million
dollars. So go for it... If you're gonna do it, you may as well
do it to a financially viable level of implementation if you
have the capability & coding chops to do so.

NeilThat looks like an ass-kicking unit... "lowest cost per
channel" yet, out of the Mucusrite ISA line? That would bring
this thing in at around \$3k street, at most, wouldn't it?

At the state I've reached, where nostalgia and history are fusing into a
vague dream, this stuff is cool.

-steveDear Tom can you please contact me ?
All my emails are bouncing back...
