gled information spewed from the hole.

>

> "A super-massive black hole lies about 28,000 light-years from Earth at
the
> center of our galaxy," explained Dr. Sherwinski.

>

> "Last year the eminent physicist Stephen Hawking revised his theory of
black

> holes -- which previously held that nothing could escape the hole's
powerful

> gravitational field. He demonstrated that information about objects that
> have been sucked in can be emitted in mangled form.

>

> "It now appears that mangled information can distort matter.

>

> "Just imagine our galaxy the Milky Way as a beautiful, handwritten letter.

>

> "Now imagine pouring a glass of water on the paper and watching the words
> dissolve as the stain spreads. That's what the chaos cloud does to every
> star or planet it encounters."

>

> To avoid widespread panic, NASA has declined to make the alarming
discovery

> public. But Dr. Sherwinski's contacts at the agency's Chandra X-ray
Observatory

> leaked to him striking images of the newly discovered chaos cloud
obliterating

> a large asteroid.

>

> "It's like watching a helpless hog being dissolved in a vat of acid," one
> NASA scientist told Dr. Sherwinski.

>

> Ordinarily, Hawkings Radiation is harmless.
>
> "It's produced when an electron- positron pair are at the event horizon of
> a black hole," Dr. Sherwinski explained. "The intense curvature of
space-time
> of the hole can cause the positron to fall in, while the electron
escapes."
>
> But when "infected" by mangled information from the black hole, the
particles
> become a chaos cloud
