free standing office dividers. They will be cheap and do a good job.
If you get creative, you can make longer legs to get them off the

ground. They can then be placed flat up against a wall when not in use.

David.

>In order not to confuse anyone here is my exact test.

On a four card Paris system I loaded a B3 tune for 3-4 seconds playing in a loop on a Paris audio track.

I pushed the level up to 10 and had submix -8.1

I was monitoring via monitor outputs and had the monitor level -12.

Now on Paris BigEq I had the filter highpass at 260Hz and lowpass at 5247, trimmer AT FULL 20 !!

This makes all the difference now between Me and XP.

Under XP even at +20 the sound becomes nowhere as distorted (well bad distortion) and the volume stays overall the same as with the BigEq OFF.

The trimmer works because lowering it the volume lowers itself too.

Now on Me with closed EQ we have the same sound (is it ?) but when eq is engaged with that full +20 there is severe distortion and loudness and fatness.

Go figure...

Can please someone with both XP and Me partitions check this please ?

When I was first using Me for some months and then switched to XP I remember that the sound was different to my ears but I said to myself well, your ears must be wrong...

Now that makes me wonder if many things act differently under XP!

Regards,
Dimitrios

I think I remember checking this when I switched to xp and the files nulled
(I'm pretty anal abo
