That blows DJ.

I rendered a ton of files as well before switching.

So far the ones I have visited have been ok.

You got me worried..

Well ****!!!! Before I sold off my Paris rig, I rendered a bunch =

of audio=20
files.. These were old demos that Amy and I did back in the mid =
90's. They=20
were tracked to 2" 24 track and then archived to ADAT. Later I =
dumped them=20
into Paris. I want to use some of the tracks for a project I am =
getting=20
ready to produce here. Apparently the Paris render corrupted the =
files. They=20
are not batching properly in Wavelab (I posted in another thread =
about=20
this). They are also having problems when converted with PAVWAV. =
Something=20
told me that if I sold off my Paris rig, something like this would =
happen.=20
Luckily I've still got the ADATs and an old XT-20 that I kept =
around. I'm=20
going to have to recreate some edits that I did subsequent to =
dumping them=20
into Paris, but that's a piece of cake with Cubase.=20
