in.com/wayward.htm or

www.cdbaby.com/Sarahtonin or iTunes.

Duane's a real nice feller, so I wanna help him through this rough time if I  
can.

That is all. As you were.

Thanks,

different XP.....I can't see how that'll help. Have you tried to install  
only one EDS at a time, and make SURE in the BIOS that it is not sharing an  
IRQ with anything else. Kill stuff like USB, modem, COM ports, LPT

Have disabled everything in the bios and the EDS cards are not sharing IRQ's.  
Different XP .. as you can see I'm at the clutching at straws stage. I did  
install to the default folder - Program Files\EMU etc so, I will give that  
a go.

Thanks,  
Warren

My UAD-1 card that I purchased in 2003 went South last week,  
disappearing from the UAD Meter config (though it still showed up  
in Apple System Profiler). I called tech support, described the  
problem, and asked what I could do. They told me the card needed  
to be replaced.

How much? Nothing. No cost.

I picked up a new one from the Canadian Distributor here in Toronto today and installed it, re-authorized the plugins (plus got a few new extra ones 'cause the card is a newer configuration)and away

Sorry Aaron and Ted.

Has this already been discussed?

Or did my question show up in one of Ted's other threads for those  
reading on the web site?

I get the group as a newsgroup in my email reader and it's a separate  
heading here.

Anyway, on the question of "should radio stations pay performance  
rights" it seems to me they should. If internet radio has to pay for  
content, why not terrestrial radio?

Cheers,  
-Jamie

Hi Bill,

I've owned LXP 1 LXP 5 and Nanoverb. Nano is good enough for live sound if it's just a dusting over vocals. It is thin sounding overall.

The LXPs are ok but nothing to write home about. The ddl in the LXP 5 = with modulation was very cool for solo guitars.

I'd check out the Behringer stuff as long as

they fit in your rack and =  
price range.

Tom

There are a couple of others on ebay too.

Gantt
