re would send it to you on the group.

3.3 is reported to have a lower latency, generally and is what most users of it w/Paris are doing.

Essentially, Direct X doesn't work so well in P

make things a bit happier. In other words, your DirectX plugs ins will be in a shell, or 'wrapped' by FXpansion to make them appear as a VST plug in Paris.

Make sense?

FWIW, Cakewalk/TwelveTone bought the adaptor at version 4.0 for inclusion into the Sonar line of DAW software. Unsure if it even works w/Paris.

AA
