1 software cd v.3.0Ok, as everyone knows, I'm interested in an 8 out, but it's got to be cheap as I can't sink more money in to a sysytem I'll be leaving soon. And I'm a poor bastard as well.

If you'll so it for 75 bucks I'll take it.

>Hey everyone,

I'm selling my PARIS rig and thought I'd try here before Ebay. It's all been racked in my smoke free home studio and most everything is in like new condition and great working order unless otherwise noted. All black unless noted. Prices include shipping to the lower 48 USA. Paypal payment preferred. Also, if anyone is interested in buying the whole shebang, I'll discount. I would also sell the Mac dual 1Ghz G4 with version 3.0 PARIS software and loads of plug-ins that used to run this system if anyone wants a turnkey system.

I don't get a chance to check the group real often anymore, so contact me by email if interested or you have questions. Tony at standinghampton dot com.

3 - EDS1000 cards - \$225.00 each

1 - 8in card (Blue) - \$200.00

1 - MEC (includes power and SCSI cables) - \$65.00

1 - MEC (includes power and SCSI cables) - \$45.00

I purchased this unit used and it has a couple small scratches on the front. The fan was also not functioning, but as has been noted here in the group, it's probably not even need unless you load it up with several cards. It never got hot and I've never had any problem with it in the three years I've used it.

1 - 442 (includes SCSI cable) - \$50.00

2 - C16's (includes CAT5 cables) - \$65.00 each

1 - IF2 - \$20.0

Thanks for looking,

TonyI guess I should have checked what the recent going prices were on this stuff.

I will entertain all offers (you know, take em' out for dinner and drinks. Put on a little magic show. Do my famous "dance of a thousand veils". That kind of stuff). ;>)

I'm looking for an EDS 1000 card and paris software. I also need cable for C16 and 442. I have 442 and C16 but would use MEC if I had one. I'd offer \$250 for everything or \$125 for one EDS card. That is all I really need...

several of you guys have contacted me about single pieces. I apologize, but
I really don't want to deal with single pieces ... I really just want to get
rid of the whole thing..So, let me just put a price tag on this, to make it
a little easier.

How about \$1200 +shipping for the whole deal.

Here is the full list again:

1 x Mec
1 x 442
4 x Adat ards
5 x 8-in
1 x 8-out
5 x C16
4 x EDS Cards
3 x EDS Cable --- 15 ' !!! These rock (the ones from card to mec)

Even if you want most of it, and leave a few pieces out we can work
something out.

Thanks,

>Ensoniq KMX-16 midi patchbay. Very rare and probably the ultimate in programmable midi connectivity - 15 in's, 16 outs. Channels 1 & 2 midi merge capable. Mint condition- \$250.00

32' long 192 channel (12 connector) midi snake. Looks like a Markertec custom job. Very high quality (Belden or equal-no molded ends). Mint condition. This has seen studio use only but would make a great stage snake. It's very heavy duty.
\$200.00-OBO

Ensoniq MR Rack. I purchased this from the keyboard player of Firefall. I hadn't used it in a while and I flipped it on while ago and it shows to be needing a new battery but other than that, it's good to go and in great shape. I'm going to unrack it over the weekend and see what I can do about the battery situation. This thing has some killer patches.....the Rhodes sounds are worth the price of admission alone. \$350.00

Boss DR 5-My first midi module. Purchased in 1995. Works great and is tres fun. I've got the manual here and also an instructional video tape (VCR format)-\$100.00

If you want 'em all, let's talk. I'll deal.

If there's no interest over the weekend, they're going up on EBay Worldwide next week. Seems the Europeans are buying lots of American gear lately.

;o)I just talked to The about the battery replacement. It's a simple soldering job + and - wires. I'm extremely busy and I'm lowering the price to \$275.00. If I solder in a new battery, I'll probaly end up keeping it.

Lowered the price of the midi snake to \$175.00. It's Rapco branded with Kellums grips and looks like new.

 Money or trade for hardware like DBX 1066 , SPL deesser, Powercore
 MKII (no
 plugins)...

Regards,

Dimitrios I'm changing up my methodology around here and have (with a bit of
 trepidation since this is so friggin bulletproof) decided to sell my large
 cue system. It consists of the following:

1 x Furman HDS-16

Furman HDS16 Headphone/Audio Distribution System | Full Compass

5 x Furman HRM-16 (remote mixer stations)-One of these has a damaged
 centronics connector on the back of the unit. It is a \$30.00 part and I have
 it on order from Furman.

Furman HDS16 Headphone/Audio Distribution System | Full Compass

6 x Furman HRM-CABL25

Furman HDS16 Headphone/Audio Distribution System | Full Compass

1 x Furman HRM-CABL50

FURMAN HRM-CABL50 FIFTY FOOT CABLE FOR USE WITH HRM-16

2 x cable couplers for longer extensions if you need to splice a couple of the cables together for longer cable runs.

4 x Alesis Wedge remote FX units-I paired one of these with each of 4 x of the HRM-16 remotes so the musicians can adjust their own FX in the cans. One of these has an intermittency issue with the power supply. It will stay powered on with just a little gaffer's tape to hold the plug in the socket and could probably be fixed with just a little effort.

The fidelity of this system is excellent with adequate headroom to drive 600 ohm cans.

The silkscreening on the some of the remote mixers has been smeared below the volume pots where they were wiped with a solvent to try to remove adhesive tape residue or sharpie ink that was used to label the controls. This, in no way affects the performance of the units and you're going to want to tape over and label these pots anyway in a tracking session.

I haven't broken the system down yet as I'm waiting for items to arrive which will allow me to get a new system up and running so I need to keep this one operational until the end of next week.

The studio is a private facility and I don't advertize by website, but here's a link to a word.doc that I created that I provide to folks who inquire about using this place. There are some pics of the system in use. the .doc is about 12MB so it will take a couple of minutes to open via BB.

Studio_Legend.doc

I want to try to move this as a turnkey system rather than parting it out right now. The current street price of this system would be around \$5000.00. Asking \$2750 for the entire system, plus shipping.

If anyone wants pics of the individual components, I can provide them upon request.

You are welcome to give me a call to discuss this.

I know a friend has a Magma chassis with PCMCIA card interface for laptop and she's been thinking about selling it for a while now. I can get more information (model, number of slots) if you like, and also pass on your offer.

When you say "no plugins" for the Powercore MKII (that's a PCI version, right?) - you mean it just comes with the core package and no "extra cost" plugins, or do you mean no plugins whatsoever?

- KHi,

Thanks for your answer.

The powercore card is a dsp booster for existing powercore owners or you can buy plugins at extra cost.

It is the pci version the latest model which has 1.5 the power of original powercore dsp.

Regarding Magma I am looking for a pc and laptop version.

Thank you

Regards,

Dimitrios

But just think what you could do if you had another one!!!
Wretched excess Jaimie.....think wretched excess

;)Heh, true. I could mixer mix my mixed mixer mixer!!

OK, you talked me into it. ;^)

Seriously though, I'm keeping mine. I just know it'll come in handy again. Plus it looks cool. Like a fancy patch bay.

>Fellow PARISians: Saturday night May 10th, someone in a smash-and-grab style burglary broke
into our auxiliary building. Police and pawn shops have been notified, and we're keeping an eye
on Craigslist. The initial inventory of stolen gear:

PARIS system MEC rack with 4 in/out; did not take the Control 16; the rack will not work without
one

Pair JBL 4410A speakers

Carvin double-neck 12/6-string electric guitar, blonde, 1970s era, 12-string on upper neck.
There's a split in the finish behind 12-string headboard opposite the nut

Parker Fly electric guitar, 1990s, dark blue

Marantz CD620 CD Recorder; did not take the remote

Marantz CDR500 CD recorder/duplicator

SSI Products consumer Pro-Logic decoder
Sony consumer cassette deck

Sanyo(?) consumer CD player

More, as we take a complete inventory.

Thanks,
Curt,

Northstar Recording, Portland, Oregon didn't have a real email, so I'll reply here, hope that's cool.
Actually the
Paris system will operate without a Control Surface 16 on it, FYI. The rack
will not work without an EDS card, however.

1 Black MEC - missing 2 front and back blank panels, but you will want to

put at least 2 modules in the thing anyway, won't you?

1 442 interface.

1 IF2

1 C16 - This works perfectly BUT the large round knob comes off. That is, if you actively TAKE it off by pulling it up. It works just fine, is just not attached to the spindle. If you really wanted to you could glue it, but unless this is getting moved around a ton it just doesn't matter.....I have the following paris gear for sale all in working order with low hours on the gear.

2 X EDS-1000 Cards \$150 Each +shipping costs

1 X C-16 \$25 +shipping costs

2 X Scsi Mec to EDS cables 6ft and 10ft \$50 +shipping costs

thanks

ToddEDS-1000

MEC

8-in

C-16

All in great shape. How much more black could they be? None. None more black. Forgot this important little detail: Make an offer on one or more bits of that list. I'm reeeeeeeeeeeeeeeally flexible. This is a multi-part message in MIME format.

Let me know.
Any system for pc desktop that can accept UAD1 cards is ok for me.

Thanks

DimitriosHey Dimitrios - if you don't have any luck here, I just checked and there's a couple on eBay right now.

If you are interested write an email at: [scattin\(at\)gmx.ch](mailto:scattin(at)gmx.ch) love all your revrbs.

Thank you for the predelay plugin !

One thing is that it is too dsp heavy !

Only 6 instances per card !

EDS compressors can be had for 16 instances so maybe I can use one compressor pugin for just the lookahead working as predelay...

I managed to make all your reverbs available as mono inserts !

I would really love to see a dry/wet mix knob as to be able to take a real benefit from the insert usage of the reverbs.

This would be mostly needed for Drumplate.

This way you can use a mono version of the reverb at the insert and follow the panning of the istrument anf freeing the auxes.

1. Is there a way to reduce dsp if the reveb plugins become mono ??

This could free some dsp and there are times ,like snare, where mono reverb is preffered as to not occupy much stereo space from the mix. In this way the dry/wet mix knob would be essential

2. A great room reverb is a must for Paris !

The rrom already there cannot compete with "your" new halls and plates !

I would love a great room reverb for an electric guitar.

3. Your drumplate can only be used twice per card as opposed to dp pro hall which can have four of it !

Is there a way to optimize that perhaps ? Maybe the less predelay would cure that ?

Thanks for what you are doing for us !!

I will contimue supporting.

Will send more very soon...

Regards,

DimitriosSorry wrong group.

I can check with UPS or Fedex (whatevah you want). We'd add the shipping to the price of the hardware and come up with a total for the unit! Thanks...no more than 500-600 eur
I sell my 2 x TLAudio EQ1 for 2 x 500 eur and C1 for 550....

Regarding your Tlaudio EQ1 or C1 are you considering trades ?

I may have some interesting stuff for you.

I am 102 positive only ebayer so you can deadly trust me in a situation like this.

Things to consider.

1) Powercore MKII unplugged (new) used a couple of hours.

2) TLaudio C-5021 stereo tube compressor (hehe)

3) SPL de-esser hardware stereo device, the

best de-eser in the world !

4) Lexicon core32 installed on a working pc complete without monitor.

5) AKG D-12 original microphone in "LIKE NEW" state !!!!

6) Audio Technica AT-4033.

I have other too...
