ing

Patchbay workaround for bouncing tracks and rendering plugins

Tired of zeroing/clearing a mix to bounce a track or tracks to a new file? Or wish you could render native plugins while listening and adjusting in context. No problem.

Open the Patch Bay. Clear all your SPDIF I/O connections. Physically (as in, on the back of your Paris 442 or MEC) loop your Paris SPDIF in to

[illegible]

-----=_NextPart_000_01F7_01C61080.574D2650--You can route to the SPDIF out and then back in on a different channel.

SPDIF Render
