tom,

i use the same box for both the mac and the pc. from =

what i=20
gather
you're doing more than i am with the midi. i just have =
the=20
one
controller (pro 88) that i use in both logic and sx for the =
vstis=20
and
the m24 for logic though it can be used for either.

have =
you=20
loaded in the sampler data crap...sorry i'm not at the puter
now =
and i=20
don't remember the what the option label is to add =
specific
hardware for=20
recognition.

" assign the output of my master keyboard>to =
Cubase,=20
engage record and
yet no note data is present when it's=20
complete.???"

are you sure you have the right order in what is=20
designated as in of
out for...man i'm sorry. i'll have to go =
out to=20
the studio to see
which is which. like i said it's been a few =
months=20
since i used sx.
..and since the other engineer hasn't been here to =
eff=20
things up i
haven't had to fix it.
