(859) 635-5762Hi Aaron,

If you want to be able to use the 1333fsb based chips which are the current ones then you will need a P35 or X38 chipset based motherboard.

Check out the Gigabyte GA-P35-DS3P (rev. 2.0) Intel DP35DP

Chris

>Hi Paul,

Hold down the Apple and S keys at boot up to go into the terminal shell.  
It will list the firewire controller when scanning the hardware.

The line will look something like this.

Firewire (OHCI) TI ID0825

It will be either TI, Lucent or Aegre.

Chris Ludwig

ADK Pro Audio

(859) 635-5762

[www.adkproaudio.com](http://www.adkproaudio.com)

[chrisl@adkproaudio.com](mailto:chrisl@adkproaudio.com) I made this post because some people insisted that Apple and Microsoft  
were

the same when it comes to ethical business practices, which is a bunch of

crap. I was just pointing out what is going on. Multiple courts of law keep finding MS guilty of breaking anti trust laws, obviously others think MS continues their unethical business practices. If nobody cares, that's fine. While we're at it, keep buying there products, I hear Vista is great!

"John" <no@no.com> wrote:

>

>what makes you a troll is that you post crap just to incite arguments.

no

>one cares/me yawnHi David.

I'm not sure what current MB's are working for people. There is some debate as to whether the EDS card (5V card) will work in newer PCI spec machines that are 3.3V.

Currently, Paris runs just fine on my Epox 9NDA3 motherboard with a Athlon64 X2 processor. This is somewhat aging tech - DDR memory, AGP video card. But it works. The only trick is turning off one of the cores when doing Paris work.

Has anyone tried (successfully or not) to run the EDS in a newer MB that supports PCI-Express for video? I have a Asus P5K-E board waiting to be used, and the PCI keying looks right, but I don't have a processor to test with.

Thanks!

-Rohde

>>Thanks for your input

>>David

>Tried to add a fifth crd but anywhere I put the cards (slots 4 and 6) and even if I put the last mec on this card there is always that error coming up !

63/3f error in initialsing Paris.

It shows after stabilizing adat cards on mecs and just before it would start the dx/vst search...

Any suggestions ?

Regards,  
DimitriosMicrosoft is worse in the sense that one can do more damage with a F-18A than a .22 rifle. Both companies are mega cap tech (250 billion for MSFT, 110 billion for AAPL) companies who \_should\_ be maximizing value for their shareholders. If Apple has never been accused of monopolistic practices I'd say that's mostly likely because they haven't had the market share in 25 years to even try to make the claim.

Then again I'm a MSCE as you noted (thought it was news to me) so what would you expect me to say?

TCB

Cool. Haven't used any of the Shuttle boxes in a long time but they used  
to be great. I still run an old 875 chipset one and it has always been  
solid.

You will seen a good jump in power for Nuendo. It works fine with the 4  
core and will use them all. It is just not totally optimized for them.

Chris

a mac - sherlock will tell you.

Add the following lines of text AFTER THE LAST LINE already in the file:

```
; BEGIN HERE
; Extra mono patches for the existing reverbs. Remove lines from here to
; the bottom of the file if things go pear-shaped.
;
;-----
patch ePlatePatch2
;-----
    box espPlateBox plateBox0 0
        parm outL { extPortId:0 }
        parm in  { extPortId:0 }

    ui little allLayoutPatchUI { l:150 t:50 w:300 h:300 title:"Plate Rev"
shortTitle:"Plate" dline:"Plate" bgPattern:patchBg statusBtnFl:1 }
        box plateBox0 ui0 { l:1 t:1 }
    endui
endpatch

;-----
patch eSmroomPatch2
;-----
    box espSmroomBox smroomBox0 0
        parm outL { extPortId:0 }
        parm inL  { extPortId:0 }

    ui little allLayoutPatchUI { l:150 t:50 w:300 h:300 title:"Room Rev"
shortTitle:"Room" dline:"Room" bgPattern:patchBg statusBtnFl:1 }
        box smroomBox0 ui0 { l:1 t:1 }
    endui
endpatch

;-----
patch eNonlinPatch2
;-----
    box espNonlinBox nonlinBox0 0
        parm outL { extPortId:0 }
        parm inL  { extPortId:0 }

    ui little allLayoutPatchUI { l:150 t:50 w:300 h:300 title:"Non Lin Rev"
shortTitle:"NonLin" dline:"Nonlin" bgPattern:patchBg }
        box nonlinBox0 ui0 { l:1 t:1 }
    endui
endpatch
```

; END HERE

Have fun,

Matt.

Almost forgot this one. Add this at the bottom of stockfx.ini to get a mono tap delay in the insert menu. The mono output is just the left channel of the normal stereo output, so you will need to pan taps left to hear them:

```
; BEGIN HERE
; Mono tapped delay patch
;-----
patch eTappedPatch2
;-----
    box espTappedBox tappedBox0 0
      parm outL { extPortId:0 }
      parm in  { extPortId:0 }

    ui little allLayoutPatchUI { l:150 t:50 w:300 h:300 title:"Tap Delay"
shortTitle:"TapDly" dline:"Tapped Delay" bgPattern:patchBg }
      box tappedBox0 ui0 { l:1 t:1 }
    endui
endpatch
```

; END HERE

Happy holidays,

Matt.I actually sent an email to digi requesting price lists since 1994.ill keep you posted.I consider it my duty.

I couldn't find the older lists on their support site.

unless someone else here has kept copies of that shit , I see no other way to know the cost.

ill keep you posted.

>

> <http://noise.youchill.com/?p=16> Can anyone educate me on the EDS ADAT card?

I'm want to sync Paris with a Digi 002 rack in order to transfer from Digi design into paris.

1st.

The ADAT connection should provide for synchronization of the machines right? (clock signal)

2nd.

In the Paris mannual it says to use digital clock source when recording or playing back non 44.1 and non 48khz sample rates. What does that mean? There are no other sample rates.

Also, some one said in a thread (so what if it's only 20 bit)

Was he talking about the ADAT card? Does the card transfer 24 bit files

At 44.1 or 48k? For any fans of modular synths, I was just poking around the Clavia G2

Product pages and found a freeware demo of their modular synth software. The cool thing is that you don't need their hardware to hear the patches, and it appears you can modify and save the mods.

I don't know if this is crippled in any way other than being a mono-voice synth. Even if it is, it appears to come with an awful lot of nice samples and tools for playing around.

It is about 7.7MB download. Check it out.

[http://www.clavia.se/main.asp?tm=Products&clpm=Nord\\_Modular\\_G2](http://www.clavia.se/main.asp?tm=Products&clpm=Nord_Modular_G2)

- Paul Artola

Ellicott City, Maryland Current project is at 258 which is 6ms of latency -40 tracks, 100FX
