>I just replaced my old Mac G3 with a Mac Dual 500Hz G4 in order to keep using my Paris rig (Paris 3.0, sound card, MEC, and Control 16). I have a question regarding which OS to use:

On the G3 I was running OS 9.2.1 and I have 9.2.1 loaded onto my G4, but

and that, actually, the most stable system prior to OSX was probably OS 9.1.0 . Since the system is dedicated to Paris, can anyone share with me their experience and advice regarding which OS works most seamlessly and efficiently with Paris.

Many thanks!

Richard Faylor

RichardFaylor@aol.com Mac os 9.22 is stable for paris 3.0 on my G4 Dp867

Eugene

"Richard Faylor" <RichardFaylor@aol.com>

---=_linux43488518--thanks for the tip. the monitors are Tannoy NFM-8 II's. each monitor has two bass ports located about 2 inches below the rim of the driver and about 8 inches below the dual-concentric tweeter.

thanks again.

jon

Which mic are you looking to mod, Cuj? Just curious.

NeilPPa LD2ube.

There is a bit of a buzz, They have sent me 3 mics, they all do it.
It actually sound fairly nice. OF course a little edgy. New caps may smooth
this out? The jensen tranny may get me more low end detail. It also seems
to murk up in front of loud stuff, say a heavy drummer. But, it does this
in sort of a cool way.
Looks like buzz could be in the PS or mic not grounded to the chasis properly.
The buzz kills me though, oh and once in a while a get the Langoliers crunching
sound. This isn't so bad for rawk, but no good on an R&B track done with
drum loops.

 > I just bought a used (modem-less) Mac G4 to dedicate to Paris. It's been years since I first installed Paris 3.0 on my old G3 and have forgotten how the installation process works. I still have my original order number, key number, and response code, but are they still valid after all these years? And since Paris is defunct, how and who would authorize the installation? Am I correct in assuming that I need to connect a modem to the G4 for authorization through the Internet or could I perform the authorization for my G4 through my old G3 which does have a modem? (I have dial-up only.) And is there someone at Ensoniq/E-Mu to perform the authorization or is it simply automated? Sorry if I sound ridiculously stupid. Any help would be greatly appreciated.
 --Richard.....which brings to mind the question, if Paris Hilton is screwing someone in the woods and a tree falls on them, does it actually make a sound?

He told me there is a deductable. I thought it was 1000.00 that would mean I would need a large loss for it to help. Btter thhan nothing but at 900.00 per year or so.

Please let me know more about what you find.

I am in need as well. Where is Music pro from and what did you here?

Dimitrios,

You a powerhouse of information! Your work with

Paris and associated plugins is great for us all.

A couple of questions:

#1) What do you mean by two times the sound?

Step 15: and redirect (full to the right) because

>Spinaudio mixes two times the sound of the track)

#2) Do you have problems with Paris automation with everything nudged?

If I have muted my tom tracks and nudge them the automation will be off. If I nudge install effects and then mute toms would this solve the problem?

>You nudge ALL YOUR TRACKS (except for the reverb return on tracks 15 = and

>16-well even if you put it there too nothing will happen anyway-)100ms to

tracks=20
 for your reverb return using 16bit (24bit
>works too) =
 silence paf=20
 file.
>Here you can create a long 5 minute file or bigger =
 and have=20
 it in handy
>anytime you want it.
>b) Use your =
 favourite=20
 compressor VST/DX/UAD!/POWERCORE/EXTERNAL for=20
 buss
>compression.
>
>4. On both uses the =
 method is=20
 around the same.
>
>5. Senderella although showing =
 up as it=20
 is in Paris as vst does not let
the
>audio pass the =
 plugin, It=20
 stops in senderella so only WET signal can =
 be
>send.
>this=20
 is useful only for bussing say dsrumtracks to a cmpressor and =
 not=20
 need
>to have also the dry tracks playing.
>In that=20
 situation no wrapper needs for senderella.
>But for full =
 use and=20
 potential senderella needs to be wrapped
>
>6. =
 Wrappers that=20
 can be used are the FREE Spinaudio=20
 =
 lite
> http://www.spinaudio.com/downloads.php?download_type=3D3& ;amp;=
 download_id=3D33 =20
 which
>can wrap ONLY one VST plugin.
>So here you =
 can wrap=20
 one instance of senderella and use it as send=20
 for
>reverbs.
>If you buy Spinaudio ofcourse you can =
 have as=20
 many plugins wrapped as you
>want.
>
>7.. =
 Senderella=20
 by renaming its dll like send1,send2,send3 etc can be=20
 used
as
>many times as you want it is that=20
 simple.
>
>8. you need to have 16bit files (empty) =
 on the=20
 receining senderella
>instances.
>
>9. If you =
 have=20
 multiple cards then use (if you want it across =
 submixes)
>tracks=20
 15 and 16 of your last card, so that all sending instances are=20
 bfore
>these two.
>
>10. On Me works but I =
 haven't got=20
 very stable resluts which may be my
>computer though so =
 you could=20
 give some more tests but on XP works just=20

fine
>here.
>

 If you buy chainer get the free Spinaudiolite and use its one=20
 instance
>to wrap only chainer.
>So UAD1 plugins =
 inside=20
 chainer will retain knob functionality and =
 lower
the
>latency=20
 down to 4096 samples for a normal UAD1 =
 plugin.
>
>12. If you=20
 wanna use all things without buying anything you can doing=20
 this:
>Get Spinaudiolite FREE and wrap=20
 senderella.
>Get FFX4 DX chainer=20
 =
 free
>http://vincent.burel.free.fr/download/ffx4_FullDemo3.zip
&=20
 gt;NOTE:=20
 FFX-4 wraps/chains ONLY DX plugins whereas Chainer wrapps/chains =
 only
>VST
>HINT: From inside Chainer you can use =
 FFX-4 so=20
 have chainer to wrap DX and
>VST....
>
>13. =
 FFX-4 also=20
 has a low 4096 samples latency for UAD plugz. If you =
 think
>that=20
 is big note that FXpansion wrapper that you guys were using =
 gives=20
 16384
>samples of latency !!
>
>14. So you =
 wrap=20
 senderella with Spinaudiolite.
>
>15. You put =
 senderella on=20
 the audio tracks you wanna send to a reverb, put
>the send =
 volume=20
 accordingly and redirect (full to the right) =
 because
>Spinaudio=20
 mixes two times the sound of the track)
>
>16. On =
 audio=20
 tracks 15 and 16 you put two 16bit empty long files (5 =
 minutes
>or=20
 more,whatever)
>17. On track 15 you open as STEREO the =

senderella=20
 again (spinaudiolite
>wrapped) and put senderella as =
 receiver=20
 .
>Then on next native slot you open FFX-4 on track 15 as =
 STEREO=20
 again.
>
>18. You open from inside FFX-4 a UAD1 =
 reverb or=20
 any other DX reverb (like
>DSPFX)
>If you put UAD1 =
 rvereb=20
 you get 4096 latency.
>If you put a DX reverb you probably =
 will=20
 get 0 latency !!, so no
>compensation needed at =
 all.
>It ius=20
 like having AUX with DX effect for Paris !
>
>19. =
 Now if you=20
 insist of using a UAD1 plugin reverb, the to compensate =
 you
>do=20
 the following:
>
>You nudge ALL YOUR TRACKS (except =
 for the=20
 reverb return on tracks 15 and
